## Symbol Legend

The Enviro-conscious symbol designates products that are environmentally preferable. These products do not contain hazardous solvents, they utilize recycled materials, incorporate recyclable components, or otherwise reduce the impact on the environment. A "green dot" ● at the end of a stock number indicates the product is Enviro-conscious. The products may also meet third party environmental standards, such as:

### U.S. EPA's Design for the Environment (DfE)

The U.S. EPA recognizes product for its use of the safest possible ingredients.

### Green Seal™ Certified

Manufacturers may submit their products for evaluation by Green Seal™. Those that comply with the requirements are authorized to use the Green Seal™ Certification Mark on their products. Green Seal™ is dedicated to safeguard the environment and promotes environmentally responsible products and services. <http://www.greenseal.org>

### EcoLogo™ (Environmental Choice)

EcoLogo™ sets standards for hand cleaners that demonstrate biodegradability, performance, limited toxicity and limited environmental impact.

### ACMI (Art & Creative Materials Institute)

The Art & Creative Materials Institute (ACMI) certifies products as non-toxic.

The CRI (Carpet and Rug Institute) Seal of Approval program identifies effective carpet cleaning solutions and equipment that clean carpet right the first time and protect a facility's carpet investment. Not all products clean well enough to earn the Seal of Approval distinction, so look for the blue and green CRI Seal of Approval as proof that you are purchasing or using a quality product. *The CRI Seal of Approval logo is a trademark of the Carpet & Rug Institute.*

The CRI (Carpet and Rug Institute) Green Label™ signifies a superior cleaning vacuum that has passed stringent testing for soil removal, dust containment and carpet appearance retention. *The CRI Green Label logo is a trademark of the Carpet & Rug Institute.*

# Green Buildings

## What they say about the cleaning industry's bottom line.

America is going green. That's certainly true of buildings, whether they're homes, commercial buildings or institutional spaces that are pre-existing or new construction. Today's building management professionals strive for new and ambitious green goals in cleaning and maintenance.

Green is everywhere, for almost everyone. Look at the big picture: eight out of ten consumers are now making green buying decisions. That's according to the 2009 National Green Buying study of 1,000 people, conducted by Green Seal™ and EnviroMedia Social Marketing. About 60 percent of shoppers in the general consumer market choose green cleaning products and look for reduced packaging.

It's safe to say that the general attitude about green carries over from the consumer realm to the cleaning industry; people in this business are consumers, too. Cleaning industry pros have another sort of green incentive – the financial kind – to put green cleaning products, services, and operations to work for them. Green products and practices deliver direct economic benefits to businesses, along with enhancements to health, safety, and environmental and social responsibility.

# Economic Impact: LEED Rating System

## Following the LEED

One international leader in green building certification is LEED — Leadership in Energy and Environmental Design. There’s more news every day, because more and more buildings are adhering to these standards. The economic impact of US Green Building Council’s (USGBC) LEED standards was recently summarized, and it is nothing short of huge. The measures so far are impressive, but the projections for growth show amazing increases in spending for green products and services, as well as jobs.<sup>1</sup>

The LEED credits for existing buildings include LEED-EB: Operations and Maintenance (O&M). Facility maintenance professionals will be held accountable for their function’s role in the organization’s sustainable practices. Contractors, take note: the recent ISSA Cleaning Industry Management Standard — Green Building (CIMS-GB) “offers cleaning organizations a certification that is closely tailored to provide customers with exactly what they need to secure” LEED-EB: O&M credits.<sup>2</sup> Of course, the new standards ensure that maintenance departments and cleaning companies are greening their overall operations as they achieve certification.

## LEED certification for the Merchandise Mart, world’s largest commercial building

At 4.2 million square feet, Chicago’s Merchandise Mart presents a massive maintenance challenge. In the process of submitting for certification for the 77-year-old building, Merchandise Mart Properties:

- Recycled waste
- Used cleaning products with low levels of volatile organic compounds (VOCs)
- Implemented a purchasing policy with green products
- Updated construction standards to include green practices
- Increased the energy efficiency of equipment throughout the building
- Implemented green standards for events within the building
- Worked with tenants to achieve certification in the LEED for Commercial Interiors rating system.<sup>3</sup>

## Top three areas for greening and cleaning

Today, manufacturers invest in R&D to create more and more products, equipment and supplies for green maintenance. There are three areas of environmental impact that receive the most attention:

- **Chemicals.** Over 6 billion pounds of cleaning chemicals are used annually.
- **Paper products.** Almost 30 million trees go into the 4.5 billion pounds of janitorial paper consumed each year; manufacturing and bleaching process have enormous environmental and health impacts.
- **Waste.** Approximately 1 billion pounds of janitorial equipment end up in landfills each year.<sup>4</sup>

By looking at these three issues, anyone in charge of cleaning commercial, public and industrial buildings can make those spaces greener.

## How being green pays off

Of course, it's good to do the best job and respect the environment in which we live and work. But there are also business dividends to consider, as well. Here are a few examples. Going green is:

- **Cost-conscious.** Concentrates require less bulky packaging, and less storage space in your facility. They also cost less to ship, and those savings can often be reflected in the price.
- **Health-conscious.** Well-trained users of safer cleaning products needn't fear side effects, and the businesses that employ custodial staff can anticipate less sick time.
- **Image-conscious.** A green business cashes in on advantages in marketing, contracting, recruiting, employee retention, and good will in the community.

Green is the color of success.

## Want to get deeper into green cleaning?

The GS-42 Green Seal<sup>®</sup> Environmental Leadership Standard for Commercial Cleaning Services requires in-house and external cleaning services to meet certain requirements. The certification standard requires:

- Planning including written operating procedures and schedules
- Products, supplies and equipment that meet eco-friendly criteria
- Cleaning procedures that address environmental goals and use approved chemicals in an efficient way
- Communication that ensures owners, managers, occupants, cleaning and facility managers and personnel are aware of plans
- Training of cleaning personnel for general procedures and site-specific needs

GREEN TIP

You can help the Hospitality industry take steps to save energy. When staying at a hotel, offer to re-use towels, skipping a change of sheets and turning in unused linens can create big savings. Many hotels are active partners in conserving energy and creating a sustainable future. Accor, which operates 4,000 hotels in 90 countries, enacted a measure in 2008 entitled “5 towels re-used = 1 tree planted” with the goal of using its laundry savings from linen re-use toward planting trees. Thanks to the savings of two years, Accor announced in 2010 that it has financed the planting of 1 million trees.

GREEN TIP

Floor mats are an excellent tool in helping create Green buildings. In addition to protecting surfaces, floor mats stop unwanted soils and moisture from entering the building. This, in turn, creates cleaner, healthier surroundings and helps prevent slips and falls. Less soil and dust also means improved air quality within the building. An effective floor mat will reduce health hazards and save money on cleaning by helping remove water, dirt and soils from soles of shoes. A healthy, sanitary environment adds to sustainability, which is one of the prime objectives of Green measures. Floor matting can also contribute to LEED Certification for Green buildings.

- Coiled vinyl loops scrape, trap and hide dirt and moisture from shoes; minimizes tracking debris into building
- Easy-to-clean crush-resistant vinyl; just hose or shake clean

Studies have shown that 2.5-6 times more dirt and soil is removed by 3M™ Dirt Stop™ and Nomad™ Scraper matting than competitive matting. Less dirt and soil tracked into facilities means reduced time, effort and energy required to keep floors clean. Fewer cleaning chemicals are required to maintain floors, which translates to fewer chemicals entering the environment, fewer volatile organic compounds (VOCs) and other indoor contaminants being released inside a facility, helping to improve indoor air quality.

3M™ NOMAD™ ENTRANCE MATS

- Dual-fiber construction for exceptional dirt and water removal
- Fibers resist staining and fading; mats look new longer
- Slip-resistant vinyl backing will not stain floor

Large, crush-resistant polypropylene fibers scrape off loose dirt not removed by outdoor scraper matting; tough, looped nylon fibers wick away water. Pattern designs hide unsightly soil between cleanings. Vacuum or use extraction method to clean. Studies have shown that 2.5-6 times more dirt and soil is removed by 3M™ Nomad™ Scraper Matting than competitive matting. Less dirt and soil tracked into facilities means reduced time, effort and energy required to keep floors clean. Fewer cleaning chemicals are required to maintain floors, which translates to fewer chemicals entering the environment, fewer volatile organic compounds (VOCs) and other indoor contaminants being released inside a facility, helping to improve indoor air quality.

**In Your Hands**

Part of a sustainable future is maintaining health and clean practices. Disease still has major impacts even in advanced countries. According to the Centers for Disease Control (CDC), the U.S. loses \$120 billion a year to infectious diseases, and more than 160,000 people in the U.S. die during a year from an infectious disease. The CDC maintains that good hand hygiene is crucial in preventing the spread of flu viruses. The CDC offers guides to hand washing at <http://www.cdc.gov/germstopper/>. Good hygiene will make a major difference in building for a healthy future.

GREEN TIP

One of the basic principles of green cleaning is to protect the health of the people that live, work, visit or study in the buildings we maintain, not just to make the buildings shiny. Green cleaning gives us the opportunity to create a truly clean environment while taking into consideration the impact our methods and products might have on human health and the planet, both short and long term. Since we don't always know what those consequences are, it is a good idea to make conservative, eco-conscious choices.

\$\$\$SAVER

A Healthy Schools Campaign-led pilot project introduced green cleaning in the Chicago Public Schools in 2003–2004. Even then, the study found that green cleaning products were readily available and performed as well as conventional products. Since then, the number of such products has increased dramatically.

# Squeegees

Product Type	Benefit Feature
--------------	-----------------

## Floor Squeegees

Clears floors of water and much more (page 79). Use to clear away large volumes of mud, snow, slush, and other debris. Squeegee frames are made with galvanized steel to withstand the heavier workload. Nylon inserts (page 79) adapt squeegees for use with Acme-threaded handles.

## Sanitary Squeegees

Available as standard or brush/squeegee combination (page 79). Ideal for hospitals, bathrooms, kitchens, dairies, swimming pools and other areas where cleanliness is key. Durable polypropylene construction resists acids.

## Water Wands

Wash and wipe away at the same time! Water Wands (page 78) combine with aluminum handles (page 92) to wash thoroughly and reach difficult spots. Use to clean grout, uneven surfaces, tiling, and more. After the washing is done, the squeegee's rubber blades whisk away standing water, leaving the surface finger dry. Adapters available (pages 78-79) to create Acme-compatible sockets on the wands, allowing for the use of tapered or threaded handles.

## General-Duty Squeegees

Perfect for washing and wiping glass. Allows for easy handling and gentler use on fragile surfaces. Use the sponge for scrubbing, flip the squeegee over, then use the rubber blade for wiping water away. For use on vehicle windows, mirrors and smooth surfaces that need cleaning and instant water removal (page 94).

## Window Squeegees

Wipe away water with a longer reach. The soft, thin rubber blade clears water from any smooth, flat surface and works perfectly on windows. Handle allows squeegee to be attached extension wands to reach higher areas (page 93).

GREEN TIP

"Green cleaning" refers to the use of products and procedures that are more healthful and environmentally conscious than others serving the same function. The Green Seal™ Environmental Standard for Commercial and Institutional Cleaning Services (GS-42), establishes environmental requirements specifying green chemicals, supplies and equipment as well as cleaning procedures. It also mandates employee training and communication with building owners and occupants.

GREEN CLEANING PROCESSES

- Carefully plan and time the chemical cleaning process. Keep a schedule of events and plan to disinfect high-traffic areas and entrances more frequently than those areas where access is limited.
- Identify occupants with special needs and implement a plan sensitive to those needs. For instance, if there are allergies to the chemicals used in cleaning, or any other allergies, be sure to design the cleaning process to avoid exposing occupants. In order to identify effectively, get the word out and invite anyone with concerns to notify the staff of their specific needs.
- Reduce chemical waste by using dilution methods as instructed by the manufacturer, tracking quantities of chemicals used and using appropriate dispensing technology to limit overuse of chemicals.
- Improve indoor air quality by maintaining sufficient outdoor ventilation. Ventilate properly when chemicals are being used in cleaning. Design a ventilation system where airflow is properly reaching the interior of the building.
- Chemicals aren't the only things releasing VOCs. Certain cleaning equipment releases harmful emissions. To reduce the impact of these effects, properly maintain your equipment and/or replace with VOC Compliant equipment.
- Disinfection should be limited to surfaces where pathogens collect, such as door handles, bathrooms and other high-traffic surfaces where there is much hand contact.

Dilution Chart

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2-oz. of concentrate into 30-oz. of water. (NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.)

CONVERSION CHART			
1 Gallon	=	128 ounces	¼ Cup = 2 ounces
1 Quart	=	32 ounces	⅛ Cup = 1 ounce
1 Pint	=	16 ounces	2 Cups = 1 Pint

GREEN TIP

Consider updating your chemical control mechanisms to get the perfect mixtures for cleaning. You'll see improvements in quality, safety and cost-effectiveness. If you are using the old "glug glug" method of measurement you are due for an update that will pay for itself by proper ratios and reduce the burden on the environment.

GREEN TIP

Going green is more than a trend. It is the new way that corporations are thinking about their energy usage and how to save money. Such as installing solar power systems and implementing measures to reduce energy and water consumption. It isn't just environmental ethics driving the movement. Green choices—like saving water and electricity—make good economic sense. Your company can benefit also, by finding ways to reduce energy consumption and take advantage of the cost savings. Since savings accumulate over time, the sooner you begin to implement a green program, the greater the benefits will be.

SPACE SAVER

Let the fragrance of your restroom enhance your facility, not detract from it. Daily restroom cleaning with disinfectants and the application of an odor counteractant will eliminate many odor problems. For restrooms that continue to have odor troubles, heavy-duty cleaning of grout, walls and ceilings using a neutralizer, applying disinfectants and enzymes, as well as using a combination of odor control devices might be required to get to the root of the problem.

### Deodorizing Blocks Defined:

#### PARA BLOCK DEODORANTS

Air-activated, freshen the air and eliminate undesirable odors. Made from paradichlorobenzene saturated with liquid deodorants. WARNING: This product contains a chemical known to the state of California to cause cancer and may not be available in all states.

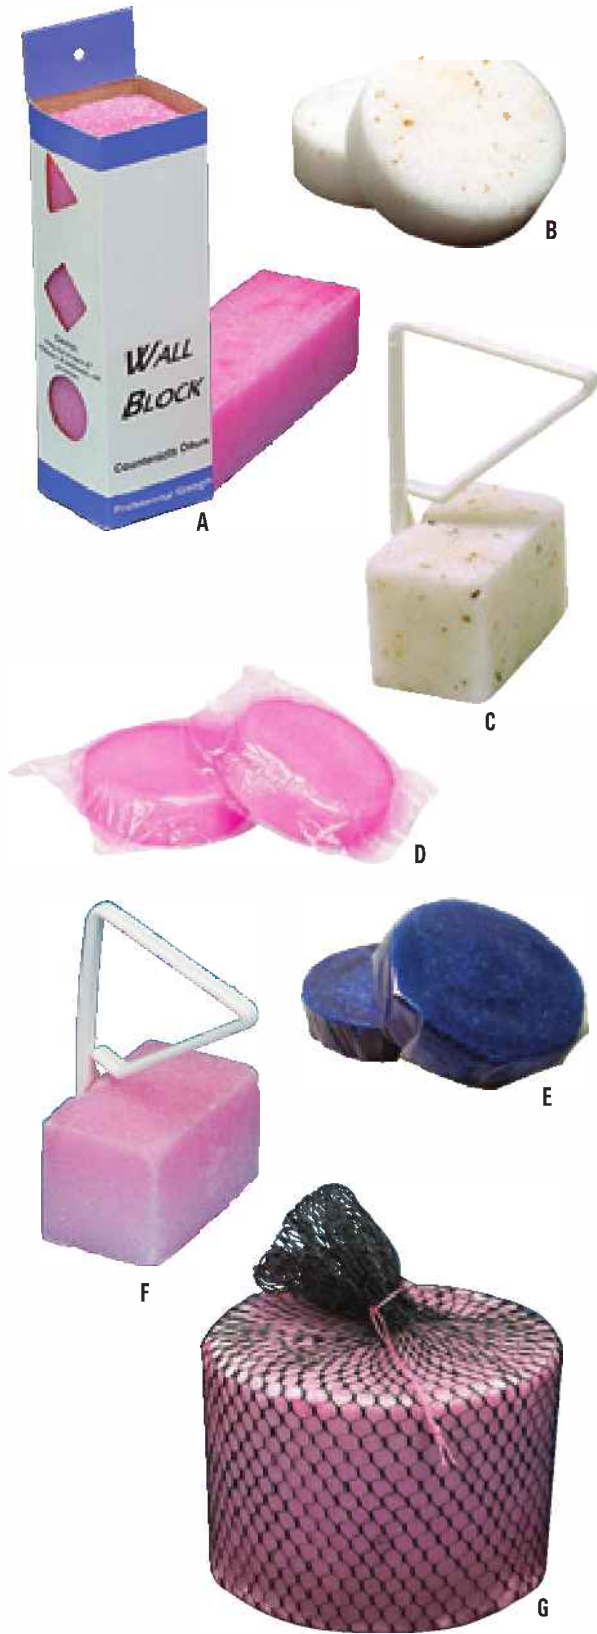

#### NON-PARA BLOCK DEODORANTS

Water-activated, counteract odors and fight bacterial growth. Contains no paradichlorobenzene.

#### ENZYMATIC BLOCK DEODORANTS

Beneficial bacteria are added to the deodorizing (Para or Non-Para) block. The bacteria release enzymes that consume the odor's source, effectively and permanently eliminating odors.

GREEN TIP

Water is a precious resource. In many parts of the world, including large parts of North America, it is also scarce and expensive. Improving conservation and good landscaping methods can reduce your reliance on water. Switching to ultra low-flush toilets, using flow-restrictive devices on sink taps, low-flow showerheads and other water conserving fixtures can help. If you are watering your landscaping, use micro-irrigation to supply water in non-turf areas and upgrade to state-of-the-art irrigation controllers and self-closing nozzles on hoses.

## What the World Needs from **Hand Care & Hygiene**

Awareness of the importance of hand washing has grown – with good reason. The news is full of stories on food contamination, flu outbreaks and other communicable disease, and even periodic reports of bioterrorism risks. Agencies including the Centers for Disease Control and Prevention (CDC), the Association for Infection Control and Epidemiology, and the Department of Health and Human Services, advocate use of hand sanitizers to prevent cold and flu.

No wonder that Americans are increasingly conscious of hand health. Raised awareness isn't restricted to the home. There's an expectation that skin care and personal hygiene products should be available in the facilities where large numbers of people come into contact with surfaces, food, and each other – like schools, corporate offices, restaurants, fast food chains and food processing plants.

Clean hands do more than support human wellness; they can contribute to a healthier planet. Some soaps and foams are formulated to reduce human and aquatic toxicity.

Any quick-acting soaps or scrubs, or rinse-free sanitizers, decrease the amount of time spent rinsing hands and running water.

Dispensers and foam formats help reduce the volume of soap used and then washed away in wastewater.

More and more dispensers are being made with recycled materials, bringing down the amount of plastic and metal going to landfills.

Whatever the environment in which people work, the new generation of skin care and hygiene can make it a healthier place.

\$\$\$SAVER

Avoid sick days. Frequent hand washing or hand sanitizing is effective in preventing an outbreak of antibiotic-resistant MRSA (Methicillin-resistant Staphylococcus aureus). Users and maintenance teams in commercial or institutional space can stay productive when handwashing and sanitizing is maximized.

Product Type	Benefit Feature	
Latex	Latex gloves provide excellent flexibility and dexterity. This makes them ideal for food handling, lab and technical environments or other applications demanding precision handling. Available in medical grade. Choose from powdered or non-powdered varieties. Fit either hand. <i>(Find these on pages 206-207)</i>	
Vinyl	Great for light-duty cleaning, painting, parts assembly, lab and foodservice environments. Vinyl gloves typically offer greater thickness and a looser fit than latex or nitrile. Gloves come with and without powder. Rolled cuff option for easy on/off. Fit either hand. <i>(Find these on page 206)</i>	
Nitrile	Nitrile provides excellent dexterity and tear strength. The material offers an alternative for users with latex sensitivities. Great for lab and chemical work or food handling. Select powdered or non-powdered. Fit either hand. <i>(Find these on pages 205, 208)</i>	
Neoprene	Neoprene is ideal for strong chemical handling. Resistance to solvents makes neoprene gloves well-suited to work with paint and varnish remover, petroleum products and harsh cleansers. Provides superior protection, greater thickness and looser fit than vinyl and nitrile. <i>(Find these on page 208)</i>	
Fabric & Leather	Canvas, knit or leather gloves work best for warehouse, assembly, furniture and materials handling. Comfortable and warm, these gloves work in environments with limited or no climate control. Choose either one-size-fits-all or specific sizes, varying by the material. Available as ambidextrous or right/left hand specific. <i>(Find these on page 209)</i>

GREEN TIP

New plastic from polymers created from corn can fulfill many of the functions of petroleum plastic. In addition, corn is an annually renewable resource that is cleaner and cheaper to acquire than petroleum. With less landfill waste and cleaner manufacturing, new plastics can go far to creating a sustainable future.

**GREEN TIP**

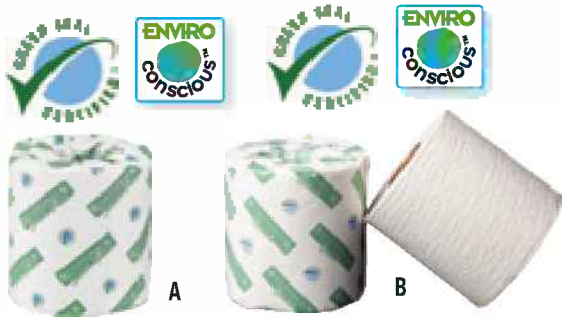

We've all heard about the environmental concern about "old-growth forests" but did you know that most paper, cardboard and products made from these are from trees that were grown as a renewable resource? Forest products—other than those from unique environments like old-growth forests—can be re-seeded, re-grown, re-harvested and recycled. This often makes products made of paper or cardboard a greener choice than plastics and foam. Of course, the best solution is always to reduce and reuse when possible, but using renewable resources can help too.

# What a difference a dispenser makes

How green is a paper product? Surprisingly, quite an important part of that answer lies in its usage. While many towels, toilet tissue, and other paper products employ recycled content and low-environmental-impact manufacturing processes, the way in which the paper is used is a major component of its environmental impact.

Proper dispensing is critical to reducing consumption and minimizing waste of the product. It's simply good sense. The more easily a restroom's visitors can access the toilet tissue and towels they need, the less likely they are to grab a wasteful handful of paper. Dispensers offer various design features to control the number of towels delivered in one motion. Toilet tissue dispensers limit the speed in which sheets are unrolled; they also often prevent access to spare rolls until the first role is fully used.

When consumption goes down, so do labor costs. Less time is spent on trash pickup. There are additional cost savings possible. For example, a high-capacity dispenser can have a greater upfront than a smaller model. But consider impact over time; staff needs to spend less time checking and restocking such a dispenser.

Proper dispensing makes for savings all around. And saving green is thinking green.

# Better for You, Better for the Environment.

## The best mops are committed to all-round performance.

Unisan™ mops tackle the toughest floor cleaning jobs, and help keep the environment healthy, too. It's a win-win situation.

The EchoMop Looped End Wet Mop Head has it all. It's long-lasting, low-lint and quick-drying. It's also a pioneer: the first mop made of fibers spun from recycled PET (polyethylene terephthalate) plastic bottles. By making a performance mop head with this material, we're doing more than cleaning floors. We're reducing landfill waste and energy consumption, and conserving petroleum resources.

Another material that makes an environmental difference is microfiber. Our Microfiber Damp Mop and Microfiber Dust Mop clean effectively. This material picks up dust and dirt like a magnet, without harsh solutions and with minimal water.

Innovative mops from Unisan are leading the way in environmentally friendly floor cleaning equipment.

Loop Mop Heads

A. EchoMop Looped End Wet Mop Head

The first mop head made from recycled PET plastic bottles, contributing to reduced landfill waste, energy consumption and impact on greenhouse gases. EarthSpun® fibers are manufactured from 30% post-consumer PET plastic bottles. Contains 97% total recovered content. Longer-lasting, lower-linting mop head offers 20% better performance than competitive all-synthetic wet mop yarns. Absorbs more than 4.4 times its weight in water and releases almost 30% upon wringing. Washable and fast drying. Dries quickly—90% dry after only the spin cycle of the washer; air dries 100% overnight. Wide 5-in. mesh headband works with clamp, quick-change or jaws mate handles (sold separately).

**GREEN TIP**

**Bamboo: A Rapidly Renewable Resource**

Raw materials that renew quickly can assist with creating a sustainable future. Bamboo can be harvested in five to seven years, whereas trees can require 10 to 50 years before harvesting. Bamboo is sturdy enough to be made into flooring and other products traditionally reserved for wood, such as cutting boards, kitchen accessories, and more. As it functions comparably to wood but renews up to 10 times faster, bamboo is a viable material alternative for a sustainable future.

GREEN TIP

The Environmental Protection Agency (EPA) has a Design for the Environment (DfE) program that screens cleaning products for their impact on health and the environment. A cleaning product can only earn the DfE label by demonstrating its ingredients pose the least concern amongst chemicals in its class. Products with the DfE label undergo screening by the DfE scientific review team to earn their certification and so demonstrate a healthy investment from their vendors. A modern mop with a red handle and a green head, next to a yellow bucket. The mop head is made of green fibers and has a yellow band around it. The bucket is yellow and has a black handle. The background is black.

## Kinder, More Environmentally Friendly Mops Invade Buckets Everywhere

It's difficult to imagine that the simple mop could be a modern tool of environmentally responsible cleanliness, a great example of improved ergonomics and even a recycling superstar! But cleaning tools such as mops, brooms and brushes have undergone many changes over the years and they are significantly greener in all of these ways.

Today's mop heads offer specific attributes that you can choose based on your needs. Choose the most appropriate length of the yarn, cut or looped ends and weight; additionally, some mop heads are made of mildew-resistant materials or designed to reduce environmental dust. Yarns are available in natural cotton and in various synthetics that tolerate chemicals well and improve absorption.

Modern mop handle design looks to save stress on users through lighter product weight and ergonomic handles. These designs may have positive effects through easier use and less fatigue.<sup>1</sup>

Perhaps the best change these days is that you have a number of options in brooms, mop heads and brushes that are made with recycled materials.

For example, by making mop heads with fibers spun from recycled plastic bottles, environmentally conscious manufacturers conserve natural resources and help diminish landfill waste. We also reduce the amount of energy used in manufacturing and use fewer expensive petroleum materials, so you can get excellent cleaning results more economically. No wonder we think these mops are great!

GREEN TIP

Think about greener solutions, not perfect solutions. It is human nature to feel overwhelmed by the challenges of taking care of something as big as the “environment.” But we aren’t going to solve the problems by becoming perfect overnight. We will do it one step at a time. Once you have a commitment to do your part you will find that there are lots of opportunities to make small differences. Some will be very easy decisions, like choosing the greener alternative or picking a vendor who offers green options. You can make a difference right now, one choice at a time.

**GREEN TIP**

Some of the most beautiful and low-maintenance landscaping these days is also what is known as “xeriscaping,” or landscaping that does not require supplemental watering. As fresh-water resources are becoming scarcer and more expensive worldwide, you will see more commercial buildings moving toward using drought-tolerant plants and groundcovers. Not only does xeriscaping lower water bills, it requires less maintenance and little or no lawn mowing. Although it requires a bit more startup work than laying sod, the benefits endure for years.

### 3M™ NOMAD™ ENTRANCE MATS

- Dual-fiber construction for exceptional dirt and water removal
- Fibers resist staining and fading; mats look new longer
- Slip-resistant vinyl backing will not stain floor

Large, crush-resistant polypropylene fibers scrape off loose dirt not removed by outdoor scraper matting; tough, looped nylon fibers wick away water. Pattern designs hide unsightly soil between cleanings. Vacuum or use extraction method to clean. Studies have shown that 2.5-6 times more dirt and soil is removed by 3M™ Nomad™ Scraper Matting than competitive matting. Less dirt and soil tracked into facilities means reduced time, effort and energy required to keep floors clean. Fewer cleaning chemicals are required to maintain floors, which translates to fewer chemicals entering the environment, fewer volatile organic compounds (VOCs) and other indoor contaminants being released inside a facility, helping to improve indoor air quality.

Glove design and construction varies; match the glove to the function. Latex gloves provide an excellent sanitary seal and help keep moisture off the hands but do not protect against sharp edges. Conversely, heavy-duty and cut-resistant gloves are not ideal for food handling functions. Glove options abound to suit every purpose. Charts and more information are available in these pages to help pick the right glove.

# Three Factors to Consider for Cost-Effective Cleaning with Vacuums

## 1. Cleaning Service Productivity:

- Multipurpose Vacuums—provide a complete cleaning solution by combining multiple cleaning steps into one, eliminating non-productive time and helping reduce payroll costs!
- Automatic Height Adjustment—adapts to many different carpet heights in the same cleaning environment. This feature helps eliminate guesswork by automatically adjusting the power head of the vacuum to the carpet height.
- Indicator Lights—incorporated into the base control panel to show when the power head is moving.
- Vacuums with Tool Accessories—accommodate multipurpose use across different types of flooring surfaces as well as upholstery.
- Intelligent Indicators—indicate a full bag, dirty filter and brush jams to speed trouble-shooting.
- Wide Cleaning Path—cleans large, minimally-furnished rooms in less time.

## 2. Green Cleaning:

- Designed to reduce the impact of cleaning products on the environment along with increasing occupant and worker health.
- To meet the increasing demand for greener equipment, vacuum-cleaner manufacturers continue to innovate. New models meet stringent outside testing standards for air filtration, optimum pick-up of soil and dust retention.
- Backpack vacuums with closed bag systems and multi-stage filtration (multiple layers of filter material to remove particles of soil) also feature quiet operation.
- HEPA or hypoallergenic filtration provide a high standard of dust removal and retention, a priority for people with allergies.
- Hospital environments, where indoor air quality (IAQ) is crucial to staff and patient well-being, benefit from using a vacuum with HEPA filtration.

## 3. Day Cleaning:

- Cleaning service contractors have seen a strong demand for cleaning during the day. This trend is driven by the rising cost of energy.
- Day cleaning can reduce utility expenses (between 25-30%) and can contribute to employee retention.
- Day cleaning encourages communication among facility staff and occupants and improves security.
- Look for vacuum cleaners with quiet operation and a one-pass cleaning solution for multipurpose use, which will minimize office disruptions.

# Vacuums

## Deep & thorough cleaning

Many vacuums offer deep and thorough cleaning of floors and upholstery; abundant choices are available. Select from uprights (pages 300-305), canisters (page 306) and backpacks (page 299).

## Wide cleaning path

A wide cleaning path saves time and increases productivity. When this is your priority, select from the many available uprights (pages 300-305). You'll also receive this benefit, along with additional cleaning capabilities for carpeted floors, from carpet extractors (page 311).

## Ease of carrying/maneuverability

Certain vacuum bodies are designed for greater portability. These units often maneuver well, too, reaching spots that bulkier units can't access, such as stairs. Depending on design, some portable vacuums work best for quick cleaning and touch-ups while others pack more power. Read the individual product description carefully to choose the vacuum that best suits your needs. Choose lightweight uprights (page 306), backpacks (page 299), and mechanical sweepers (page 307).

## Filtration and IAQ

For spaces where allergens cause particular concern, including hospitals, doctor's offices, and schools, HEPA filtration systems add value. Select HEPA/allergen filtration uprights (pages 300-301).

## Carpet heights

Many upright vacuums feature height adjustment, either manual or automatic. This option allows smooth transitioning between flat surfaces and carpet heights. For this capability, review your options for uprights with height adjustment (page 304).

## Wet surfaces

For workshops, garages and areas with wet debris, select vacuums specially designed for such applications. Choose units that are wet/dry (page 310).

And for professional deep cleaning of carpets, choose carpet extractors (page 311).

GREEN TIP

Cutting back on carpet care can have serious impacts on the life of carpeting. A carpet with a 10-year lifespan may last six years with less frequent maintenance. If carpet care budgets need to be reduced, increase vacuuming to compensate for fewer deep cleans.

# Pedestrian Safety

## Smarter Pedestrian Safety Systems

According to OSHA, slip, trip and fall accidents are the leading cause of injuries in commercial environments. Safety systems help reduce accidents within your facility and provide a level of preparedness that lowers your exposure to personal injury liability. Warning patrons and employees of potentially dangerous areas is key to preventing injuries and avoiding expensive lawsuits. Rubbermaid® Commercial Products offer the most complete and innovative pedestrian safety systems available. From standard floor signs to mobile barricades, you'll find a solution that is sized just right for your facility and any safety warning need. Innovative and easy-to-use, Rubbermaid® Commercial Products pedestrian safety tools deliver product quality and value. Simply put, safety is good business.

GREEN TIP

The EPA can help you find places to recycle electronic equipment. Remember—the computers, monitors and cell phones that may be out of date for your state-of-the-art office building can give others opportunities they might not otherwise have. Take the time to look up these resources online at [www.epa.gov](http://www.epa.gov). In fact, the EPA’s website is a great source of green information if you have questions about how to properly dispose of many dangerous materials. You will also find many helpful free programs, publications, pdfs and podcasts.

Casters to Meet Your Needs

POLYOLEFIN

Hard-tread polyolefin casters roll easier than soft tread casters. Nonmarking, impact and chemical resistant casters won't flat-spot under static loads or pick up metal shavings, nails and other debris. Excellent on concrete, wood, carpet and steel surfaces.

PNEUMATIC

Pneumatic casters provide a cushioned and quiet ride for fragile loads, making them ideal for rough and uneven surfaces, inside and out. Excellent on virtually all surfaces from smooth concrete to gravel.

THERMOPLASTIC RUBBER (TPR)

TPR casters absorb shock and provide floor surface protection and quiet operation. Excellent on linoleum, tile, terrazzo, wood, smooth concrete and carpet.

# Trucks

Product Type	Benefit Feature
--------------	-----------------

## Tilt trucks

This truck maximizes maneuverability. The design matches the name: these trucks make it easy to dump contents. Making them ideal for handling bulky materials and loads that are medium to heavyweight. Wheels and the overall profile help protect surroundings. Consider your need for the lid option. *(Find these on pages 344-345)*

## Platform trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items, less when loads are more well-balanced. Some platform trucks offer work-height surfaces. *(Find these on pages 346-349)*

## Hand trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. *(Find these on page 346)*

## Convertible trucks

Change configurations to use one truck in multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. *(Find these on pages 330, 347)*

## Smarter Recycling Systems – Made with PCR

Rubbermaid® Commercial Products provide an extensive array of products for implementing an effective recycling program for any kind of facility. From personal collection containers to centralized collection stations, to efficient mobile transport systems, Rubbermaid® has it all. Facility managers today understand that recycling helps conserve our natural resources and improve quality of life. Effective solid waste management also makes good business sense. All Rubbermaid® metal waste containers are made from post-consumer recycled content (PCR) (30% for steel and 70% for aluminum). All blue plastic recycling and metal containers exceed EPA guidelines for post-consumer recycled content (PCR) and assist in obtaining LEED credits. Recycle for a better tomorrow.

\$\$\$SAVER

Buy more waste receptacles to save labor costs. Studies show that people often use a hand towel to open door handles when exiting restrooms. Place waste receptacles near towel dispensers and also by the restroom exit door and less garbage will need to be picked up.

GREEN TIP

Don't throw electronic equipment away. Most of it can be given away to charities that will use cell phones, printers, computers, copiers, fax machines, etc. Some will even pick up the equipment for you. There are a lot of students and teachers who will appreciate any used computer equipment. There are even organizations that collect electronics to take overseas. When you dispose of equipment responsibly, your old equipment will get a second life. There is toxic material in electronic equipment and most of the plastics, silicone and metals won't biodegrade, so you will be doing us all a favor to keep it out of landfills.

GREEN TIP

How many plastic bottles does your company throw away each year? Plastic bottles are made from petroleum products and if they are used a single time without recycling, we have lost an expensive limited resource. Recycling plastic bottles helps our country reduce dependence on expensive foreign oil. Provide special bottle recycling bins in areas where there is eating and drinking or high traffic such as entrances, parking lots, etc.

**SCRAPER MATS**

Did you know that 80-90% of all dirt that enters a building is tracked in on people's feet? Using a Scraper Mat can save money on cleaning as well as on floor maintenance and repair. Resilient vinyl loops on the mat's surface scrape dirt and moisture off shoes, trapping them in the mat for later removal. Shake, rinse or vacuum out the mat, and the dirt is gone!

Linear Low-Density

**Can Liner Color**—Black, white and natural are the most common can liner colors. The “see through” quality of natural bags makes them ideal for environments where transparency is required for security purposes. If transparency is not required, black or white bags are preferred. Special color can liners (red, yellow, blue, brown, gray) can be used for at-a-glance content identification. For example, red bags are often used to indicate hazardous waste while blue bags may identify recyclable waste.

**Can Liner Roll Types**—A *bulk pack* consists of can liners that are separately folded, then stacked on top of one another or are folded together. A *cored roll* consists of can liners that are rolled together on top of a cardboard cylinder (similar to paper towel rolls). A *coreless roll* consists of can liners that are tightly rolled together without a cardboard cylinder. The can liners on both cored and coreless rolls may be connected by perforated edges or interleaved for nonperforated dispensing.

Choose from two types of plastics

Linear Low-Density (LLD)

Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears, either from the surrounding environment or through transportation to disposal units. (Find these on pages 376-378)

High-Density (HD)

When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits, performing well with waste that is heavy or has sharp edges, such as glass or other industrial items. (Find these on pages 379-382)

Strength grade and gauge

Throughout this section, you'll see items listed by strength grades as well as gauge. Here's how the two measures relate. Refer to this data to make the appropriate choice for your applications.

**Light** — Use for crumpled paper, cups and light waste.

**Medium** — Appropriate for packaging waste, wet paper and similar mixed trash.

**Heavy** — Choose for light wood, metal scraps and wet cardboard.

**Extra-Heavy** — Select for when trash is consistently heavy, wet or sharp.

**Super/Extra-Heavy** — Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Gauge equivalents

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauges.

Strength Grade	Linear Low-Density Mil Gauge	High-Density Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom seals

**Star Seals** — the most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

**Flat Seals** — holds more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

**Gusset Seals** — another seal found in flat-style bags. Offer good fit in certain receptacles and appropriate for somewhat lighter loads.

\$\$\$SAVER

Hand washing is recognized by the Centers for Disease Control and Prevention (CDC) as one of the most important means of preventing germs from spreading. On the flu alone, Americans spend \$1.3 billion on direct medical costs. Lost productivity in the workplace can add another \$15 billion to the annual tab.

Cutting Boards

A. CUT-N-CARRY® Cutting Boards

The only cutting boards that prevent three types of cross-contamination. The patented food safety hook ensures sanitary carrying, preventing body or apparel contact. Boards hang on wire shelving for safe drying and storage. The original Kolor-Cut® system helps monitor safe preparation of different types of foods. Durable co-polymer construction provides superior heat, chemical and warp resistance in commercial dishwashers. Tough surfaces won't dull knives and prevent unsafe cut grooving where dirt and bacteria can hide. The cutting board choice of professional chefs worldwide. Shpg. wt. 32-lbs.

**KLEEN PAIS™**

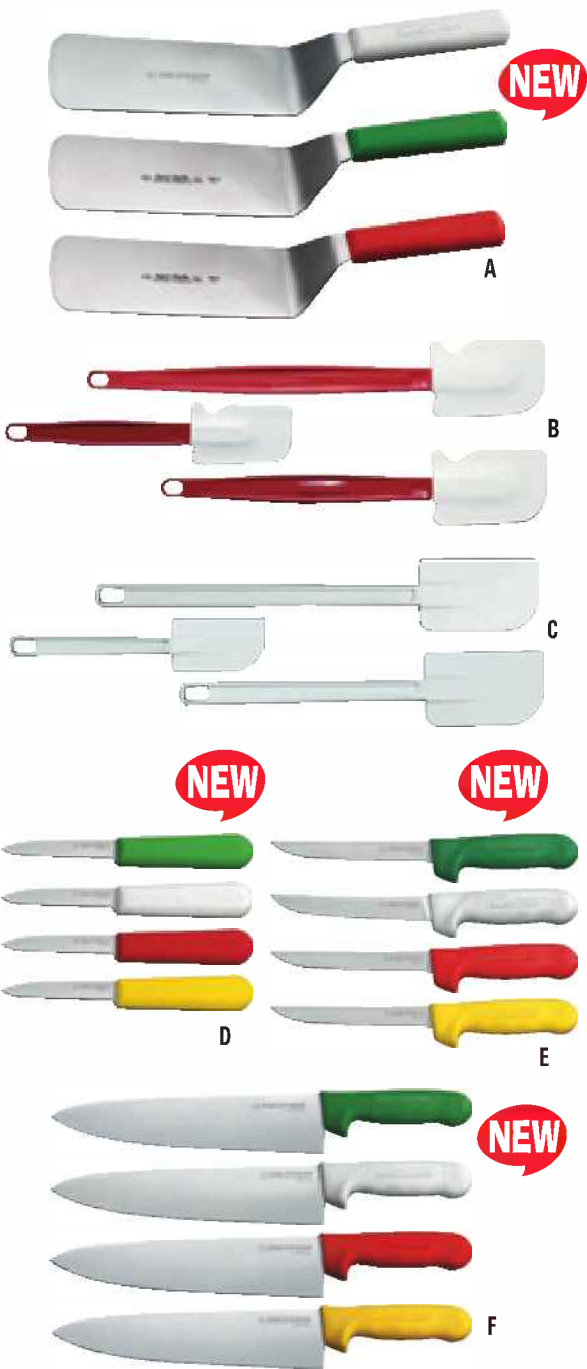

For health and safety purposes, it is important to differentiate between cleaners for foodservice surfaces and other cleaners. Other surface cleaners contain higher and more poisonous amounts of cleaning agents. Thus, using the wrong cleaner on a foodservice surface could have severe consequences. Kleen Pails™ meet HACCP guidelines to help separate containers for food and non-food surface cleaning.

Pro Save™ Ice Handling System

- Reduces the risk of cross-contamination and improves employee safety.

A. Pro Save™ Scoop with Hand Guard

Angled handle positioned over ice cavity protects hand from contacting ice, reducing risk of cross-contamination. Relieves wrist strain. Reinforced leading edge improves durability. Combines with an open style Scoop Holder RCP 9F43 (sold separately) when stored. NSF Certified and dishwasher safe. Transparent Blue. 11.97l x 6.7w x 7.72h. Shpg. wt. 7.10-lbs.

RCP 9F50 **Each 39.60**

B. Scoop Holder

For use with 74-oz. Scoop with Hand Guard RCP 9F50 (sold separately). Open for air drying to reduce the risk of mold and bacteria growth. 10.05l x 7.48w x 5.43h. Shpg. wt. 5.83-lbs.

RCP 9F43 **Each 31.80**

C. Ice Tote Lid

The ice tote lid fits securely on the ice tote, RCP 9F54 TBL (sold separately). This reduces cross-contamination risk during transport by hand carry or when totes are placed on the Rubbermaid® ice cart, RCP 9F55 BLA (sold separately). The ice tote lid is NSF Certified and commercial dishwasher safe. Black. 11.25w x 12l x 2h.

RCP 9F73 BLA **Each 25.80**

D. Ice Tote with Bin Hook Adapter

Ice bin hook adapter allows the ice tote to attach to nearly any ice machine, reducing cross-contamination, ice spillage and employee back strain, while improving efficiency. The ice tote (patent-pending) features an angled top surface and pouring spout to reduce spills. Fits in most commercial dishwashers and includes a rear hang hook for upside down drying. Ergonomic comfort grip allows for safe transfer and ease of use. NSF Certified. 5.5-gallon, 25-lb. capacity. Dedicated ice only. Blue tint. 13.3w x 12.2l x 22.1h.

RCP 9F54 TBL **Each 105.00**

E. Ice Only Cart

Ice only cart holds two or four ice totes, RCP 9F54 TBL (sold separately). Ice cart safely and securely transports 100-lbs. of ice. Handle folds flat for storage. Includes hook for on-board storage of ice tote lids, RCP 9F73 BLA (sold separately). Metal components for handle and side rails, structural foam deck. Four 5-in. nonmarking casters transport up to 500-lbs. Black. 21.4-in. wide, 39.1-in. length.

RCP 9F55 BLA **Each 692.00**

F. Saf-T-Scoop® & Guardian System™ for Ice Machines

A revolutionary design that makes filling ice totes safer, faster and easier. Saf-T-Scoop®'s dome allows mounding of ice without spilling, reducing the number of scoops to fill ice totes by up to 50%. Ergonomically angled handle provides outstanding balance and comfort. Angled chute directs ice right into the ice tote machine. Guardian provides safe, dedicated scoop storage and mounts inside or outside of the ice bins with included wireforms and hardware. Durable polycarbonate construction, dishwasher safe, NSF listed.

SAN SI9000 **Each 139.00**

G. Saf-T-Ice® Snap-Tight Lid

Keep your ice protected during transport with the lid designed especially for the Saf-T-Ice® tote. Perfect for locations including, portable bars to fill small service bins, remote or outdoor catering and customer areas such as restaurants, bars or pool side.

SAN SI6500 **Each 5.20**

H. Original Saf-T-Ice® Tote

Saf-T-Ice® tote is ideal for safe ice transport. Provides high capacity carrying (25-lbs. when filled) and manual cleaning.

E. Cutlery Dispensers for SmartStock™ Utensils

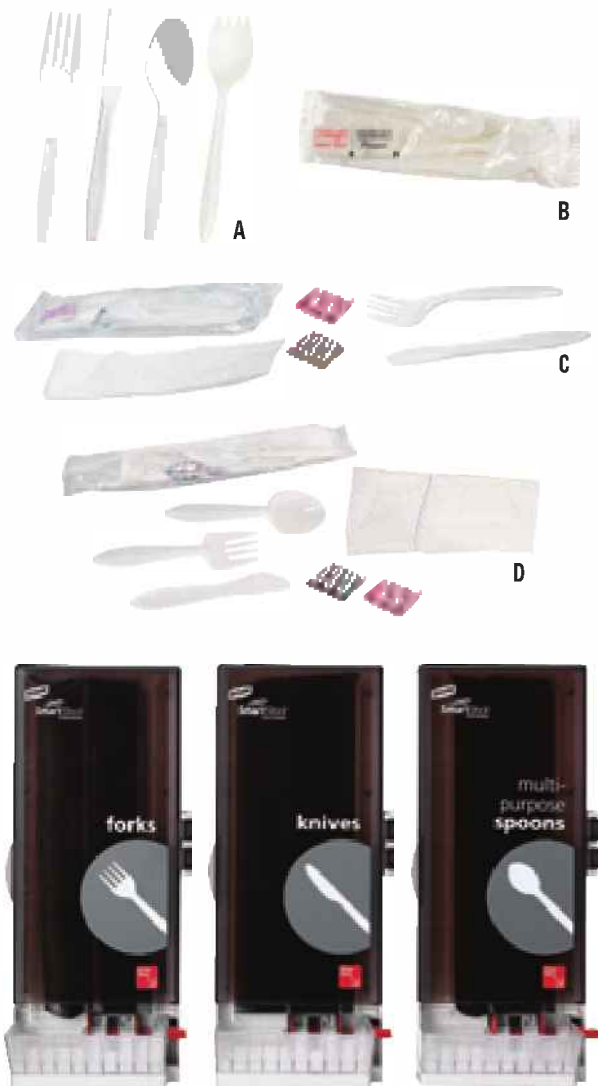

Each of these sturdy, visually appealing towers is designed specifically to hold and discharge one of three types of self-serve utensils- fork, knife or multipurpose spoon. There isn't a more efficient orderly way for you to stock—and your customers to select—the cutlery that is an essential part of your everyday foodservice operation. Promotes good hygiene; enclosed design protects cutlery from contaminants. Speeds up restocking and frees up valuable counter space. Translucent Smoke.

ENERGY SAVER

Kitchen equipment has two price tags: the purchase price and the price for the energy and water it uses. With advanced technologies, new appliances use up to 50% less energy and water than standard models. The money saved on utility bills can more than make up for the higher upfront expenditure.

**SWEEPERS**

Quickly attack crumbs and dirt under restaurant tables and high traffic areas without dragging out the vacuum. Floor sweepers are lightweight, cordless and can be safely used on multiple surfaces making them perfect for quick touch ups and daytime use. There are no bags or filters to replace which means emptying out dirt and debris is easier than ever.

SPACE SAVER

Americans toss out enough paper and plastic cups, forks and spoons every year to circle the equator 300 times. To keep that waste moving out of the breakroom, make sure you have a good inventory of bags and can liners on hand.

ANTI-FATIGUE MATS

Heavy traffic on hard floors can take its toll on employees. Continuous exertion from foot traffic and even extended time periods spent standing in one spot are taxing. Workers in foodservice, industrial, and other business environments will find relief within the padding inside anti-fatigue mats. These mats also help prevent slips and falls by providing protection from oil and liquids. Provide relief and safety for employees to help your business.

GREEN TIP

Individuals can save energy for the future and save money in the present with easy measures. For example, adjust home thermostats to reduce heating or cooling while the residents are out. Or form a carpool to save money on gas while reducing carbon emissions from cars. Also, consider small home electronic adjustments. Some electronic devices continue to draw power even when switched off. Either unplugging appliances when not in use or plugging devices into a smart power strip will cut down on wasted energy. Consider these small steps to save money and energy both for now and later.

GREEN TIP

Did you know that you could save thousands of dollars a year by carpooling? Carpooling helps to keep costs low and reduces the amount of carbon released into the atmosphere and our dependence on foreign oil. For example, imagine that two people ride together and that resulted in a savings of 15 gallons of gas per week. Multiply that over one year and the savings is 780 gallons. Let's say that the cost of gas averaged \$4.00 per gallon over the year. That's a savings of \$3,120 per year! And there would be 15,600 fewer pounds of carbon in the atmosphere as well.
