Symbol Legend

The Enviro-conscious symbol designates products that are environmentally preferable. These products do not contain hazardous solvents, they utilize recycled materials, incorporate recyclable components, or otherwise reduce the impact on the environment. A "green dot" ● at the end of a stock number indicates the product is Enviro-conscious. The products may also meet third party environmental standards, such as:

U.S. EPA's Design for the Environment (DfE)
The U.S. EPA recognizes product for its use of the safest possible ingredients.

Green Seal™ Certified
Manufacturers may submit their products for evaluation by Green Seal™. Those that comply with the requirements are authorized to use the Green Seal™ Certification Mark on their products. Green Seal™ is dedicated to safeguard the environment and promotes environmentally responsible products and services.
<http://www.greenseal.org>

EcoLogo™ (Environmental Choice)
EcoLogo™ sets standards for hand cleaners that demonstrate biodegradability, performance, limited toxicity and limited environmental impact.
ACMI (Art & Creative Materials Institute)
The Art & Creative Materials Institute (ACMI) certifies products as non-toxic.

The CRI (Carpet and Rug Institute) Seal of Approval program identifies effective carpet cleaning solutions and equipment that clean carpet right the first time and protect a facility's carpet investment. Not all products clean well enough to earn the Seal of Approval distinction, so look for the blue and green CRI Seal of Approval as proof that you are purchasing or using a quality product. *The CRI Seal of Approval logo is a trademark of the Carpet & Rug Institute.*

The CRI (Carpet and Rug Institute) Green Label™ signifies a superior cleaning vacuum that has passed stringent testing for soil removal, dust containment and carpet appearance retention. *The CRI Green Label logo is a trademark of the Carpet & Rug Institute.*

CHANGE Behavior, CHANGE Buying

A Greener Shopping List

Everyday items:

- ✓ Cleaning solutions with green formulas
- ✓ Microfiber mops and cleaning cloths
- ✓ Recyclable/recycled paper products
- ✓ Biodegradable plastic garbage bags

Long-term investments:

- ✓ Energy-efficient cleaning equipment
- ✓ Insulated windows
- ✓ LEED Certified building renovation and construction

With little or no spending, you can institute changes that can make any facility a greener place to work. Take a few simple steps to focus on key areas on environmental impact; plan programs for conservation of energy and water, and management of waste, including recycling. Provide structures and systems that make it easier for every user of a space to behave in a more environmentally friendly way. Be certain education and training play their part in your plan.

Once you've changed behavior in your facility, step up your efforts and change your buying habits. Make greener purchasing choices. Substitute items that you use everyday with greener options to reduce environmental impact. And invest in upgraded equipment and building improvements to make an even greater green difference.

Conserving Resources Pays

By economizing on energy and water use, you can achieve significant savings in the operation of a commercial space. It helps to make a plan based on good information. A California utility company provides an energy self-survey for the restaurant industry, helping operators of such facilities find where there's room for improvement in their usage of energy and water. The restaurant survey looks closely at these spaces:

- Kitchen and serving area
- Dining area
- Dish room
- Roof top
- Parking lot and exterior

You might be surprised to see how the energy usage numbers really add up. Remember, knowing how you consume can point you toward ways to conserve. For restaurants, energy usage breaks down according to these percentages:

35%
Food Preparation

13%
Lighting

28%
HVAC

18%
Sanitation

6%
Refrigeration

Find out what resources your utility company offers to help your facility conserve energy and water. Implementing thoughtful changes in usage of water and energy can help any facility or residence save big. (www.fishnick.com/about/services/sitesurveys)

Recycling Becomes Routine

Recycling transforms waste into useable resources, saves energy and sometimes even generates revenue (where recycling haulers offer programs that compensate facilities for uncontaminated recyclable materials). Recycling initiatives also provide the raw material for a positive image among employees and customers of any facility. No wonder communities, businesses and consumers are recycling more than ever.

See how your establishment can recycle (and don't forget to use recycled materials, too).

- **Audit your daily waste.** Once again, planning is a great place to start. Review what your facility disposes of on a daily basis and identify what can be recycled. Use this audit to develop an overall waste management plan
- **Follow through on the plan with education and promotion.** Train maintenance employees on recycling practices. Provide clear instructions, with pictures, at recycling receptacle locations to ease participation by all the users of the facility.
- **Set up a system for your facility.** Color-code your containers and make sure they are clearly identified with signage. Provide recycling receptacles with easily accessible lids and use clear, biodegradable plastic bags, so maintenance staff can see the recyclables and sort as needed. (conserve.restaurant.org/issues/recycling.cfm)

Standards Have Green Cleaning Products Covered

You can find greener cleaning products of every type today, and there's certification to prove it. In August 2011, Green Seal™, Inc., the nation's oldest independent non-profit environmental certification organization, released two new standards for specialty cleaners. GS-52 and GS-53, Specialty Cleaning Products for Household and Institutional and Industrial Use, provide standards for products ranging from dish soaps, graffiti removers, automotive cleansers, deck and outdoor cleaners, to odor removers and polishes and waxes, among others. The standards also provide guidance on what requirements to look for in specifying greener disinfectants and sanitizers. Green Seal™ released standards for general purpose cleaning and floor cleaning products nearly two decades ago. (www.greenseal.org)

TIME SAVER

To ensure efficient execution of a cleaning program, set up a system and train accordingly. The federal park system developed useful guidance while studying cleaning at Yellowstone National Park. Make sure staff has the equipment that's needed and knows how to use it. For instance, assign appropriate measuring devices to mix concentrates in addition to supplying solutions themselves. Ask questions during training sessions, too. You may find out that staff members share common misconceptions that could create problems, like believing that bleach can be mixed into any cleaning solution to disinfect surfaces.

DUST MOPS

Dust mops can cut down on airborne dust, reducing dust-related health problems. Before dust builds up on floors or becomes imbedded into the carpet, use a dust mop on a daily basis to regulate dust control.

A dust mop that's properly treated and correctly sized, can help reduce cleaning time and labor and makes dust control easy!

GREEN TIP

One of the basic principles of green cleaning is to protect the health of the people that live, work, visit or study in the buildings we maintain, not just to make the buildings shiny. Green cleaning gives us the opportunity to create a truly clean environment while taking into consideration the impact our methods and products might have on human health and the planet, both short and long term. Since we don't always know what those consequences are, it is a good idea to make conservative, eco-conscious choices.

ENERGY SAVER

Prevent energy – and money – from running down the drain. Set water heaters to the temperature that's required within your facility and for your purposes. Look at this example from the Pacific Gas & Electric Food Service Technology Center: a restaurant dishwasher requires either 110° or 140°F. A heater set 10°F too high costs an extra \$650.00 per year on your utility bill. A heater set 20°F too high adds \$1300.00 year.

ENERGY SAVER

Some dilution control systems require only a cold water connection. That adds flexibility to where the dispensing system is located, and saves the energy that would otherwise go to heating water.

GREEN TIP

"Green cleaning" refers to the use of products and procedures that are more healthful and environmentally conscious than others serving the same function. The Green Seal™ Environmental Standard for Commercial and Institutional Cleaning Services (GS-42), establishes environmental requirements specifying green chemicals, supplies and equipment as well as cleaning procedures. It also mandates employee training and communication with building owners and occupants.

GREEN CLEANING PROCESSES

- Carefully plan and time the chemical cleaning process. Keep a schedule of events and plan to disinfect high-traffic areas and entrances more frequently than those areas where access is limited.
- Identify occupants with special needs and implement a plan sensitive to those needs. For instance, if there are allergies to the chemicals used in cleaning, or any other allergies, be sure to design the cleaning process to avoid exposing occupants. In order to identify effectively, get the word out and invite anyone with concerns to notify the staff of their specific needs.
- Reduce chemical waste by using dilution methods as instructed by the manufacturer, tracking quantities of chemicals used and using appropriate dispensing technology to limit overuse of chemicals.
- Improve indoor air quality by maintaining sufficient outdoor ventilation. Ventilate properly when chemicals are being used in cleaning. Design a ventilation system where airflow is properly reaching the interior of the building.
- Chemicals aren't the only things releasing VOCs. Certain cleaning equipment releases harmful emissions. To reduce the impact of these effects, properly maintain your equipment and/or replace with VOC Compliant equipment.
- Disinfection should be limited to surfaces where pathogens collect, such as door handles, bathrooms and other high-traffic surfaces where there is much hand contact.

Dilution Chart

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2-oz. of concentrate into 30-oz. of water. (NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.)

GREEN TIP

Always keep the big picture in mind as you green your cleaning program. According to the U.S. Department of the Interior's Office of Environmental Policy and Compliance, greener cleaning improves air quality, worker health outlook, and the larger environmental outlook. And the same government agency points out that more environmentally friendly cleaning alternatives are increasingly available, and cost-effective, too.

Product Type

Benefit Feature

Floor Squeegees

Clears floors of water and much more (page 91). Use to clear away large volumes of mud, snow, slush, and other debris. Squeegee frames are made with galvanized steel to withstand the heavier workload. Nylon inserts (page 91) adapt squeegees for use with Acme-threaded handles.

Sanitary Squeegees

Available as standard or brush/squeegee combination (page 91). Ideal for hospitals, bathrooms, kitchens, dairies, swimming pools and other areas where cleanliness is key. Durable polypropylene construction resists acids.

Water Wands

Wash and wipe away at the same time! Water Wands (page 90) combine with aluminum handles (page 118) to wash thoroughly and reach difficult spots. Use to clean grout, uneven surfaces, tiling, and more. After the washing is done, the squeegee's rubber blades whisk away standing water, leaving the surface finger dry. Adapters are available (pages 90-91) to create Acme-compatible sockets on the wands, allowing for the use of tapered or threaded handles.

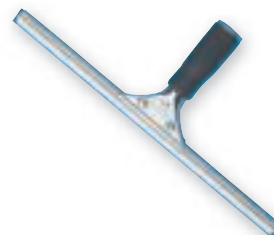

General-Duty Squeegees

Perfect for washing and wiping glass. Allows for easy handling and gentler use on fragile surfaces. Use the sponge for scrubbing, flip the squeegee over, then use the rubber blade for wiping water away. For use on vehicle windows, mirrors and smooth surfaces that need cleaning and instant water removal (page 120).

Window Squeegees

Wipe away water with a longer reach. The soft, thin rubber blade clears water from any smooth, flat surface and works perfectly on windows. Handle allows squeegee to be attached extension wands to reach higher areas (page 119).

GREEN TIP

Consider the benefits of green cleaning products relative to indoor air quality. The U.S. Department of Interior notes that improving the indoor air quality of schools improves school performance, increases attendance, and lowers the incidence of asthma. Similar results should be expected by improving the indoor air quality of any space.

Selecting Your Fragrance

An important key to fragrancing is selecting the perfect scent for your area. Here are some tips from the professionals:

- Fruity scents counteract strong odors and provide fruity fragrance that is great for areas such as restrooms.
- Fresh scents give an impression of cleanliness. These fragrances are great for rooms such as laundry areas, lobbies and general traffic areas.
- Floral scents are great all-purpose fragrances, providing a fresh cut flower neutral scent perfect for any area.

GREEN TIP

Going green is more than a trend. It is the new way that corporations are thinking about their energy usage and how to save money, such as installing solar power systems and implementing measures to reduce energy and water consumption. It isn't just environmental ethics driving the movement. Green choices—like saving water and electricity—make good economic sense. Your company can benefit also, by finding ways to reduce energy consumption and take advantage of the cost savings. Since savings accumulate over time, the sooner you begin to implement a green program, the greater the benefits will be.

SPACE SAVER

Let the fragrance of your restroom enhance your facility, not detract from it. Daily restroom cleaning with disinfectants and the application of an odor counteractant will eliminate many odor problems. For restrooms that continue to have odor troubles, heavy-duty cleaning of grout, walls and ceilings using a neutralizer, applying disinfectants and enzymes, as well as using a combination of odor control devices might be required to get to the root of the problem.

Labor and product costs are appropriate when the right processes and solutions are used for the task. Deep scrubbing and disinfecting take time and specific chemicals, and are mandated in spaces including hospital patient rooms, restrooms and areas used for food preparation and packaging. Even in a hospital or food processing facility, private offices, break rooms and entryways require a less stringent cleaning standard. Low-risk areas such as retail spaces necessitate simply a clean appearance.

GREEN TIP

Water is a precious resource. In many parts of the world, including large parts of North America, it is also scarce and expensive. Improving conservation and good landscaping methods can reduce your reliance on water. Switching to ultra low-flush toilets, using flow-restrictive devices on sink taps, low-flow showerheads and other water conserving fixtures can help. If you are watering your landscaping, use micro-irrigation to supply water in non-turf areas and upgrade to state-of-the-art irrigation controllers and self-closing nozzles on hoses.

DIAL COMPLETE® ANTIMICROBIAL FOAMING HAND SOAP SYSTEM

Cost-effective, foaming dispensing system provides a high level of broad-spectrum germ-killing action to help stop the spread of infection. Patented Activated Triclosan™ technology significantly reduces the level of germs left on hands after handwashing—over 25 times more effective than other antibacterial soaps. Effective against MRSA, VRE, staphylococcus, streptococcus, E. coli and salmonella. Mild, hypoallergenic foaming soap formulas contain aloe and glycerin to leave skin soft, smooth and refreshed. High-volume lather uses less soap. NSF Certified for an E2 rating.

A. Dial Professional® Foaming Soap Dispenser

Soap level is clearly visible through translucent dispenser. Push-type dispenser is ADA Compliant. Holds 1-liter refills (sold separately). ABS plastic construction. Includes both screw-mount hardware and an adhesive-back mount option. 5⁹/₁₆W x 4⁷/₈D x 9⁹/₁₆H.

SPACE SAVER

Simplify. Do an audit of your cleaning solutions and products, and use fewer products for more purposes. At a Yellowstone National Park project, auditors identified many benefits of standardizing select products. Stocking fewer products resulted in better inventory control and reduced storage needs, as well as the elimination of old products that might be used improperly.

**GREEN TIP**

New plastic from polymers created from corn can fulfill many of the functions of petroleum plastic. In addition, corn is an annually renewable resource that is cleaner and cheaper to acquire than petroleum. With less landfill waste and cleaner manufacturing, new plastics can go far to creating a sustainable future.

Product Type

Benefit Feature

Latex

Latex provides excellent flexibility and dexterity. This makes them ideal for food handling, lab and technical environments or other applications demanding precision handling. Available in medical grade. Choose from powdered or non-powdered varieties. Fit either hand. *(Find these on pages 230-231)*

Vinyl

Great for light-duty cleaning, painting, parts assembly, lab and foodservice environments. Vinyl gloves typically offer greater thickness and a looser fit than latex and nitrile. Gloves come with and without powder. Rolled cuff option for easy on/off. Fit either hand. *(Find these on page 230)*

Nitrile

Nitrile provides excellent dexterity and tear strength. The material offers an alternative for users with latex sensitivities. Great for lab and chemical work or food handling. Select powdered or non-powdered. Fit either hand. *(Find these on pages 228-229)*

Neoprene

Neoprene is ideal for strong chemical handling. Resistance to solvents makes neoprene gloves well-suited to work with paint and varnish remover, petroleum products and harsh cleansers. Provides superior protection, greater thickness and looser fit than vinyl and nitrile. *(Find these on page 229)*

Fabric & Leather

Canvas, knit or leather gloves work best for warehouse, assembly, furniture and materials handling. Comfortable and warm, these gloves work in environments with limited or no climate control. Choose either one-size-fits-all or specific sizes, varying by the material. Available as ambidextrous or right/left hand specific. *(Find these on page 191)*

GREEN TIP

Put your green maintenance efforts first against the green initiatives that are most widely demanded by today's facility manager. More than 80 percent of businesses have recycling programs, and 62 percent use green cleaning supplies at their sites, according to a recent study conducted by the International Facility Management Association. Serve these needs and you'll see a green payoff.

GREEN TIP

We've all heard about the environmental concern about "old-growth forests" but did you know that most paper, cardboard and products made from these are from trees that were grown as a renewable resource? Forest products—other than those from unique environments like old-growth forests—can be re-seeded, re-grown, re-harvested and recycled. This often makes products made of paper or cardboard a greener choice than plastics and foam. Of course, the best solution is always to reduce and reuse when possible, but using renewable resources can help too.

GREEN TIP

The Environmental Protection Agency offers guidance for government purchasing of truly eco-friendly products, and the same important principles apply in the private sector.

- Environmental measures should become part of normal purchasing practice, right alongside product safety, price, performance and availability.
- Environmental preferability is tied to pollution prevention, which strives to eliminate or reduce risks to human health and the environment.
- Pay attention to multiple attributes that factor into the product's entire life cycle, from production through disposal.
- Consider the scale and reversability of the environmental impacts, the degree of difference among the impacts of competing products or services, and the overriding importance of protecting human health.
- Comprehensive, accurate, and meaningful information about the environmental performance of products or services is necessary to making green choices.

The simple handsfree dispenser.

Touchless roll towel dispensers help prevent the spread of germs.

Holds roll towels with any size core, including coreless and solid.

DON'T FORGET!

Product Type

Benefit Feature

Touchless

Hygienic touchless dispensers prevent the spread of germs by controlling towel dispensing automatically; users don't make any physical contact with the dispenser. Many touchless dispensers use a smaller footprint, increasing your mounting options. *(Find these on pages 252-253, 255)*

Lever

Lever dispensers are economical, flexible, and simple to operate and maintain. Set a clear limit on the number of towels used with one lever pull per towel. Lever dispensers function manually and require no batteries, eliminating a step in maintenance and getting rid of the expense of providing power. *(Find these on page 253)*

Crank Roll

Economical and rugged, crank roll towel dispensers are a cost-efficient choice for any application that combines heavy use and a limited maintenance schedule. Consider crank roll dispensers when you're looking for a strong utilitarian choice. *(Find these on page 253)*

C-fold, Multi-fold, Single-fold, Slimfold

Without any moving parts, C-fold and multi-fold towel dispensers represent a low-maintenance option. At the same time, these dispensers are designed to allow hygienic delivery of towels to users. Choose lower-capacity units to limit the possibility of waste where cross-contamination is a concern. *(Find these on pages 258-259)*

Center-pull

Center-pull models combine easy loading systems with easy dispensing. There's a component of hygiene, too, as users touch only one towel at a time. These dispensers are sturdy enough for high-traffic facilities. *(Find these on page 250)*

A. Hygienic Push-Paddle Roll Towel Dispenser

Combines portion control with an enhanced push-paddle design. Forearm-use design reduces cross-contamination. Holds rolls up to 8-in. dia. Locking. ADA Compliant when properly installed. Mounts with screws (not incl.) or universal mounting plate (not incl.) Smoke plastic. 12 $\frac{1}{2}$ w x 10 $\frac{1}{2}$ d x 14h.

GPC 543-38 **Each 106.00**

B. SofPull® Mechanical Hardwound Roll Towel Dispenser

Delivers a single towel, saving the cost and the mess associated with traditional folded towels. This dispenser is the perfect choice for all offices that desire a quick, convenient hand drying that minimizes the risk of cross-contamination. Features a stub roll transfer to help minimize run out. Easy and quiet operation with sleek styling that is sure to impress. Translucent Smoke. 12 $\frac{1}{2}$ w x 9 $\frac{1}{2}$ d x 16 $\frac{1}{2}$ h.

GPC 594-89 **Each 69.60**

C. SofPull® Automatic Touchless Towel Dispenser

Automatically dispenses a single towel when you wave your hand. Touch-free dispenser provides quick and convenient hand drying that minimizes the risk of cross-contamination. Easy installation and maintenance. High tech functionality and sleek styling create a look that is highly professional and sure to impress. Black. 12 $\frac{1}{2}$ w x 6 $\frac{1}{2}$ d x 10 $\frac{1}{2}$ h

Use Your Mophead

Hard-working, high-performing mops make sense.

Unisan™ mops up almost all cleaning challenges with innovative floor cleaning equipment that's tough and environmentally friendly at the same time.

The Patriot Mop offers great durability thanks to its unique yarn, sourced from military uniform manufacturing. The recycled yarn blends cotton and synthetics, including Kevlar®, for overall toughness and resistance to abrasion. The Patriot is designed for heavy duty use and reuse after laundering.

EDGE® Nonwoven Cut End Wet Mops use a highly absorbent, 100% post-industrial fiber blend for increased absorption, so you get the same mopping power with less material. This leading-edge yarn is designed to avoid unraveling that leaves lint and broken strings behind. EDGE® heads are ideal for wax stripping, disinfecting, quick spill pick-up and general usage.

Unisan takes mopping to the next level with innovative, eco-friendly materials.

UNISAN™

The background of the entire page is a close-up, high-contrast photograph of a mop head. The mop head is dark and appears to be made of a dense, fibrous material, possibly microfiber. It is positioned in the lower-left quadrant of the frame. The rest of the image is a light, neutral color, likely a floor or a wall, which is covered in a repeating pattern of small, light-colored circles. These circles are arranged in a grid-like fashion, with some circles slightly overlapping others. The overall color palette is muted, consisting of various shades of gray, beige, and light blue.

GREEN TIP

Cleaning for appearance only is a perfectly acceptable standard for spaces including offices and retailers. By interspersing water-only and detergent cleaning procedures, you can reduce overall maintenance expenses and go green as you limit or eliminate use of harmful chemicals. A facility might require a deeper scrubbing weekly or monthly instead of daily, alternating with water-only cleanings to effectively clean visible grime — giving floors an overall polished look, while washing away any residual detergent and preventing unwanted buildup.

GREEN TIP

Some of the most beautiful and low-maintenance landscaping these days is also what is known as "xeriscaping," or landscaping that does not require supplemental watering. As fresh-water resources are becoming scarcer and more expensive worldwide, you will see more commercial buildings moving toward using drought-tolerant plants and groundcovers. Not only does xeriscaping lower water bills, it requires less maintenance and little or no lawn mowing. Although it requires a bit more startup work than laying sod, the benefits endure for years.

Mesh bag minimizes tangling and protects mop heads during laundering.

A. EchoMop Looped End Wet Mop Heads

The first mop head made from recycled PET plastic bottles, contributing to reduced landfill waste, energy consumption and impact on greenhouse gases. Longer-lasting, lower-linting mop head offers 20% better performance than competitive all-synthetic wet mop yarns. Absorbs more than 4.4 times its weight in water and releases almost 30% upon wringing. Washable and fast drying. Dries quickly—90% dry after only the spin cycle of the washer; air dries 100% overnight. EarthSpun® fibers are manufactured from 30% post-consumer PET plastic bottles. Product contains 97% total recovered material. Wide 5-in. mesh headband works with clamp, quick-change or jaws mate handles (sold separately). 12 mop heads per case. ♻️

GREEN TIP

Bamboo: A Rapidly Renewable Resource

Raw materials that renew quickly can assist with creating a sustainable future. Bamboo can be harvested in five to seven years, whereas trees can require 10 to 50 years before harvesting. Bamboo is sturdy enough to be made into flooring and other products traditionally reserved for wood, such as cutting boards, kitchen accessories, and more. As it functions comparably to wood but renews up to 10 times faster, bamboo is a viable material alternative for a sustainable future.

WAVEBRAKE® MOPPING SYSTEMS

Promote a safer workplace. The patented, molded-in WaveBreaker® inhibits wave formation, which reduces splashing by 40%. Buckets stack, even with the wheels attached, for more efficient storage. Tested to exceed 50,000 cycles, the wringers are more than twice as durable. 30° handle bend is easier on the user's wrist and shoulder.

WaveBreaker® Mopping Trolleys—35-Qt.

Improve productivity with this compact janitor's cart and mopping combo, all in one. Trolley handle for easy transport and storage of safety sign and lobby dust pan (with optional hanger, RCP 2535, available as special order only). Removable maid caddy for two spray bottles and cleaning supplies. Accommodates a 13-gal. poly liner for waste collection. System also includes "bucket-in-bucket" design to separate clean and dirty water and an additional accessory bucket for extra cleaning solution or waste collection. Bucket capacity: 35-qt. Wringer capacity: up to 32-oz. mops.

Product Type

Benefit Feature

Cut-end wet mop heads

Mop heads with cut ends are available in designs that fasten to, screw-in, clamp or grip handles. They're available in cotton, synthetic blend and all-synthetic fibers, with value-priced and premium yarns. *(Find these on page 282)*

Looped end mop heads

Mop heads with looped ends offer multiple benefits, as the looped design reduces tangling, avoids unraveling and fraying, and lessens linting. The addition of a tailband helps prevent even more tangles. A tailband also provides more floor coverage with each stroke and less streaking, for faster mopping and reduced labor. *(Find these on pages 283-285)*

Cotton

An economical choice, a cotton mop head often requires the tradeoff of some break-in time. Cotton absorbs well. Consider cotton absolutely suitable for general cleaning purposes. *(Find these on pages 282-283, 285-286)*

Synthetic/synthetic blends

Pure rayon offers immediate absorbency and quick release, making it a smart choice for finishing floors, disinfecting and application of chemicals. Blended fibers can deliver up to five times the absorbency of 100% cotton and lend well to general cleaning, disinfecting and application of chemicals. Synthetic and synthetic blend mop heads withstand repeated laundering with minimal or no shrinkage, and are better suited to heavy cleaning when compared to cotton. *(Find these on pages 282, 285-286)*

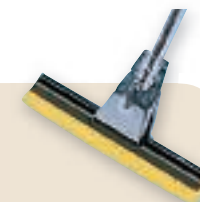

Microfiber

The leading edge of mop head fibers, microfiber cleans more effectively than cotton and offers far greater durability through multiple launderings versus synthetic blends. By using microfiber, you can reduce and often eliminate cleaning chemicals. Microfiber lends itself to tube designs, and tube mop heads reduce drag, easing labor. Lightweight yet highly absorbent, microfiber mop heads can help lower the risk of injury. *(Find these on page 285)*

Sponge

Sponge mops include lever functionality for easy wringing of the soaked mop head. *(Find these on page 286)*

GREEN TIP

Think about greener solutions, not perfect solutions. It is human nature to feel overwhelmed by the challenges of taking care of something as big as the "environment." But we aren't going to solve the problems by becoming perfect overnight. We will do it one step at a time. Once you have a commitment to do your part you will find that there are lots of opportunities to make small differences. Some will be very easy decisions, like choosing the greener alternative or picking a vendor who offers green options. You can make a difference right now, one choice at a time.

Industrial

Industrial upright vacuums are as heavy-duty as their name implies. Choose for heavy-duty cleaning in offices, government buildings and hotels. Select a vacuum with a wide cleaning path to clean large, minimally furnished rooms in less time; other widths are available for other layouts. A great choice for day cleaning, quiet operation features are a real advantage. Look for large-capacity shake-out bags or dust cups and extra-long power cords to maximize cleaning efficiency, save time and reduce maintenance. *(pages 328-330)*

Filtration

Choose HEPA uprights to improve indoor air quality. A HEPA vacuum filter or bag retains 99.97% of allergens as small as 0.3 microns – or about 240 times smaller than a human hair. Items with HEPA classification range from vacuum filters and disposable dust bags, to completely sealed systems that force all of the air leaving the vacuum through a HEPA exhaust filter. Hospitals, schools and certified green buildings are ideal environments for HEPA cleaners. *(pages 323-329, 333)*

Domestic

For light yet thorough cleaning of a limited space, choose a domestic vacuum, designed to deliver regular maintenance to a home or small business. Be aware of the degree of filtration the cleaner offers and seek out allergen or HEPA filtration if that's a priority. Look for height adjustment controls to handle multiple flooring types, onboard attachments that add flexibility, low-cost bagless systems and ample cord length for extended reach. *(page 327)*

Lightweight

A lightweight vacuum is built for quick, frequent cleanups and maneuverability. In spaces with furniture and other obstacles, this type is ideal for hotels, doctors' offices and schools. Choose from options such as cordless sticks and compact deep cleaners that deliver the same powerful performance of a full-sized machine. Many lightweight cleaners offer superior filtration, onboard tools and carpet height adjustment controls. *(pages 325-326)*

Backpack

Backpack vacuums offer mobility as well as quiet operation. Back and shoulder straps secure the cleaner to the maintenance worker, adding to comfort and ease of carrying. Choose closed bag systems and highly effective multi-stage filtration, in which multiple layers of material thoroughly remove soil particles. HEPA filtration renders a backpack vacuum appropriate for environments where indoor air quality is a concern. Many models are surprisingly lightweight. Use in spaces with large expanses of bare floors and areas containing an abundance of furniture such as office buildings, schools and hospitals. *(page 333)*

Canister

Canister vacuums are flexible and compact, making them ideal to reach into inaccessible areas that are often hard to clean. Easy, powerful detail cleaning is enhanced by attachments including upholstery tools, dusting brushes and wand extension. Models with shoulder straps transport more easily and HEPA-ready units help improve indoor air quality. Choose canister cleaners for spaces that demand detail cleaning and those with an abundance of hard surfaces and stairs, such as schools, hospitals, hotels and office buildings. *(page 332)*

Carpet Extractors

Carpet extractors come in many shapes and sizes, from spot cleaners to full-size models with powered brushes to deep-clean large carpeted areas. Features like revolving brushrolls, fingertip controls, metal cleaning wands and large-capacity solution tanks add value. Ideal for use in spaces with high-traffic areas like offices, hotels and government buildings. *(pages 336-337)*

Floor Machines

Get hard surfaces to shine in high-traffic areas in schools, government buildings and hospitals. These units are designed to maintain and restore hard floors with the use of different pads or brushes for scrubbing, stripping, buffing or polishing. For this heavy-duty work look for quality construction. UL Approved models offer durable steel gears and parts. Smooth operation features, multi-speed motors and a safety shutoff switch, add to ease of use. *(pages 338-339)*

Smarter Facility Maintenance

Rubbermaid HYGEN™

The Rubbermaid HYGEN™ Clean Water System has an industry first filter that takes the dirt out of the water and off your floor.

- Integrated filter improves productivity and reduces chemical/water waste
- Innovative twin roller wringer requires 50% less force to wring than a side press wringer
- Back-flushable filter is easy to use and maintain
- Built-in agitators remove at least 25% more dirt from mops
- Adjustable wringer accommodates different mop thicknesses and desired moisture levels
- Floor drain for easy and fast emptying
- Filter Bucket that attaches to all RCP cleaning carts

**A. Air Purifier 100**

Filter made with HEPA media traps 99.97% of dust and pollens down to 0.3 microns. Rinsable pre-filter also catches lint, pet hair and other large pieces. Ionizer emits negative ions into the air that cling to and weigh down airborne particles and germs making them easy to trap. Three-speed fan easily adjusts for multiple levels of cleaning power. Timer can be set for two-, four- and eight-hour operation cycles. Change filter LED indicator informs when to change the filter. Reduces contaminants in the air by reducing smoke, dust and pollen particles, helping to make the air cleaner and better to breathe. Meets and certified AHAM RoHS Compliant. Black. 6 $\frac{5}{8}$ "w x 9 $\frac{1}{4}$ "d x 15 $\frac{1}{2}$ "h. Manufacturer's two-year limited warranty.

B. Air Purifier 600

Titanium dioxide filter boosts UV bulb which helps remove airborne germs, bacteria and other microorganisms that are exposed to the short UV wavelengths. Traps 99% of germs that pass through it under UV light. Rinsable pre-filter captures large pieces while HEPA media filter removes dust and pollens down to 0.3 microns. Ionizer emits negative ions into the air that cling to and weigh down airborne particles and germs making them easy to trap. Intellisense™ control system senses air quality and automatically adjusts fan speed to the optimal setting for current dust levels. Charcoal filter absorbs airborne odors. Reduces contaminants in the air by reducing smoke, dust and pollen particles, helping to make the air cleaner and better to breathe. Meets and certified AHAM RoHS Compliant. GREEN TIP

The EPA estimates that there are 136 million tons of construction and demolition debris generated in the U.S. annually, or 2.8-lbs./person/day. If your building is undergoing any kind of rehabilitation or construction, keep in mind that there are many government organizations and recycling facilities that will assist you with recycling or reusing excess materials and some kinds of demolition debris. You can be the one that makes these materials available for reuse and keep them out of our landfills and waste streams.

Casters to Meet Your Needs

POLYOLEFIN

Hard-tread polyolefin casters roll easier than soft tread casters. Nonmarking, impact and chemical-resistant casters won't flat-spot under static loads or pick up metal shavings, nails and other debris. Excellent on concrete, wood, carpet and steel surfaces.

PNEUMATIC

Pneumatic casters provide a cushioned and quiet ride for fragile loads, making them ideal for rough and uneven surfaces, inside and out. Excellent on virtually all surfaces from smooth concrete to gravel.

THERMOPLASTIC RUBBER (TPR)

TPR casters absorb shock and provide floor surface protection and quiet operation. Excellent on linoleum, tile, terrazzo, wood, smooth concrete and carpet.

Benefit Feature

Tilt trucks

This truck maximizes maneuverability. The design matches the name: these trucks make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Wheels and the overall profile help protect surroundings. Consider your need for the lid option. *(Find these on pages 370-371.)*

Platform trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items, less when loads are more well-balanced. Some platform trucks offer work-height surfaces. *(Find these on pages 372-375.)*

Hand trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. *(Find these on page 372.)*

Convertible trucks

Change configurations to use one truck in multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. *(Find these on pages 357, 373.)*

\$\$\$SAVER

Buy more waste receptacles to save labor costs. Studies show that people often use a hand towel to open door handles when exiting restrooms. Place waste receptacles near towel dispensers and also by the restroom exit door and less garbage will need to be picked up.

**GREEN TIP**

How many plastic bottles does your company throw away each year? Plastic bottles are made from petroleum products and if they are used a single time without recycling, we have lost an expensive limited resource. Recycling plastic bottles helps our country reduce dependence on expensive foreign oil. Provide special bottle recycling bins in areas where there is eating and drinking or high traffic such as entrances, parking lots, etc.

SCRAPER MATS

Did you know that 80-90% of all dirt that enters a building is tracked in on people's feet? Using a Scraper Mat can save money on cleaning as well as on floor maintenance and repair. Resilient vinyl loops on the mat's surface scrape dirt and moisture off shoes, trapping them in the mat for later removal. Shake, rinse or vacuum out the mat, and the dirt is gone!

Can Liner Color—Black, white and natural are the most common can liner colors. The “see through” quality of natural bags makes them ideal for environments where transparency is required for security purposes. If transparency is not required, black or white bags are preferred. Special color can liners (red, yellow, blue, brown, gray) can be used for at-a-glance content identification. For example, red bags are often used to indicate hazardous waste while blue bags may identify recyclable waste.

Can Liner Roll Types—A *bulk pack* consists of can liners that are separately folded, then stacked on top of one another or are folded together. A *cored roll* consists of can liners that are rolled together on top of a cardboard cylinder (similar to paper towel rolls). A *coreless roll* consists of can liners that are tightly rolled together without a cardboard cylinder. The can liners on both cored and coreless rolls may be connected by perforated edges or interleaved for nonperforated dispensing.

Choose from two types of plastics

Linear Low-Density (LLD)

Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears, either from the surrounding environment or through transportation to disposal units. (Find these on pages 402-404)

High-Density (HD)

When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits, performing well with waste that is heavy or has sharp edges, such as glass or other industrial items. (Find these on pages 405-408)

Strength grade and gauge

Throughout this section, you'll see items listed by strength grades as well as gauge. Here's how the two measures relate. Refer to this data to make the appropriate choice for your applications.

Light — Use for crumpled paper, cups and light waste.

Medium — Appropriate for packaging waste, wet paper and similar mixed trash.

Heavy — Choose for light wood, metal scraps and wet cardboard.

Extra-Heavy — Select for when trash is consistently heavy, wet or sharp.

Super/Extra-Heavy — Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Gauge Equivalents

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauges.

Strength Grade	Linear Low-Density Mil Gauge	High-Density Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom seals

Star Seals — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

Flat Seals — Holds more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

Gusset Seals — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

KLEEN PAILS™

For health and safety purposes, it is important to differentiate between cleaners for foodservice surfaces and other cleaners. Other surface cleaners contain higher and more toxic amounts of cleaning agents. Thus, using the wrong cleaner on a foodservice surface could have severe consequences. Kleen Pails™ meet HACCP guidelines to help separate containers for food and non-food surface cleaning.

\$\$\$SAVER

A California utility company promotes energy efficiency ideas for the commercial foodservice kitchen; many of these ideas apply to any space. Consider two simple tips relating to hot water systems. Insulate the pipes distributing hot water through the facility. The utility company's case-study casual dining restaurant used about 2000 gallons of hot water a day, and \$20 worth of foam insulation saved more than \$300 per year in energy to heat the water tank.

GREEN TIP

Individuals can save energy for the future and save money in the present with easy measures. For example, adjust home thermostats to reduce heating or cooling while the residents are out. Or form a carpool to save money on gas while reducing carbon emissions from cars. Also, consider small home electronic adjustments. Some electronic devices continue to draw power even when switched off. Either unplugging appliances when not in use or plugging devices into a smart power strip will cut down on wasted energy. Consider these small steps to save money and energy both for now and later.
