Green Reference Guide

Pages 464-475

Includes a listing of every Green product in the catalog, listed both by vendor and by category. It's a quick, easy and trouble-free way for the Enviro-conscious buyer to find Green products.

Safety Section

Pages 268-319

We know the priority you place on safety: that it's essential from break rooms and boardrooms to production areas and restrooms. Now you can find all of the top selling safety products—such as eye, face, head and body protection; hearing protection; back support; fire abatement; first aid and fall protection—in one place. The Safety section makes meeting compliance requirements, reducing costs and increasing morale and productivity an easy, one-stop experience.

Solutions Page

Throughout the catalog, you will find product feature and benefit pages, along with innovative and traditional ways to use the products. Who knows—you may find great new ways to improve efficiency in your corner of the world with a new product!

Symbol Legend

The Enviro-conscious symbol designates products that are environmentally preferable. These products do not contain hazardous solvents; they utilize recycled materials, incorporate recyclable components, or otherwise reduce the impact on the environment. A "green dot" ● at the end of a stock number indicates the product is Enviro-conscious. The products may also meet third party environmental standards, such as:
U.S. EPA's Design for the Environment (DfE)
The U.S. EPA recognizes product for its use of the safest possible ingredients.

Green Seal™ Certified

Manufacturers may submit their products for evaluation by Green Seal™. Those that comply with the requirements are authorized to use the Green Seal™ Certification Mark on their products. Green Seal™ is dedicated to safeguard the environment and promotes environmentally responsible products and services.

EcoLogo™ (Environmental Choice)

EcoLogo™ sets standards for hand cleaners that demonstrate biodegradability, performance, limited toxicity and limited environmental impact.

The CRI (Carpet and Rug Institute) Seal of Approval program identifies effective carpet cleaning solutions and equipment that clean carpet right the first time and protect a facility's carpet investment. Not all products clean well enough to earn the Seal of Approval distinction, so look for the blue and green CRI Seal of Approval as proof that you are purchasing or using a quality product. *The CRI Seal of Approval logo is a trademark of the Carpet & Rug Institute.*

Foam Soaps

Soaps & Dispensers

DIAL COMPLETE® FOAMING HAND SOAPS

Provides a high level of broad-spectrum germ-killing action to help stop the spread of infection. Its patented Activated Triclosan™ formulation provides 25 times better germ-kill than other antimicrobial soaps. Effective against MRSA, VRE, staphylococcus, streptococcus, E. coli, and salmonella. Its hypoallergenic foam is excellent for very frequent hand washing and contains skin soothing conditions like oil and glycerin to leave hands feeling soft, smooth and refreshed. Use in any commercial setting including healthcare facilities, schools, offices, foodservice and day care. NSF Certified for an E2 rating.

Antibacterial Foaming Hand Wash

Hospital-strength formula is over 10 times more effective at killing germs than ordinary soap, yet mild enough for frequent use. Active-Foam™ system provides instant lather that rinses clean and leaves a fresh scent.

GREEN TIP

“Green cleaning” refers to the use of products and procedures that are more healthful and environmentally conscious than others serving the same function. The Green Seal™ Environmental Standard for Commercial and Institutional Cleaning Services (GS-42), establishes environmental requirements specifying green chemicals, supplies and equipment as well as cleaning procedures. It also mandates employee training and communication with building owners and occupants.

GREEN CLEANING PROCESSES

- Carefully plan and time the chemical cleaning process. Keep a schedule of events and plan to disinfect high-traffic areas and entrances more frequently than those areas where access is limited.
- Identify occupants with special needs and implement a plan sensitive to those needs. For instance, if there are allergies to the chemicals used in cleaning, or any other allergies, be sure to design the cleaning process to avoid exposing occupants.

In order to identify effectively, get the word out and invite anyone with concerns to notify the staff of their specific needs.

- Reduce chemical waste by using dilution methods as instructed by the manufacturer, tracking quantities of chemicals used and using appropriate dispensing technology to limit overuse of chemicals.
- Improve indoor air quality by maintaining sufficient outdoor ventilation. Ventilate properly when chemicals are being used in cleaning. Design a ventilation system where airflow is properly reaching the interior of the building.
- Chemicals aren’t the only things releasing VOCs. Certain cleaning equipment releases harmful emissions. To reduce the impact of these effects, properly maintain your equipment and/or replace with VOC Compliant equipment.
- Disinfection should be limited to surfaces where pathogens collect, such as door handles, bathrooms and other high-traffic surfaces where there is much hand contact.

Dilution Chart

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2-oz. of concentrate into 30-oz. of water. (NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.)

GREEN TIP

Always keep the big picture in mind as you green your cleaning program. According to the U.S. Department of the Interior's Office of Environmental Policy and Compliance, greener cleaning improves air quality, worker health outlook, and the larger environmental outlook. And the same government agency points out that more environmentally friendly cleaning alternatives are increasingly available, and cost-effective, too.

GREEN TIP

Consider the benefits of green cleaning products relative to indoor air quality. The U.S. Department of Interior notes that improving the indoor air quality of schools improves school performance, increases attendance, and lowers the incidence of asthma. Similar results should be expected by improving the indoor air quality of any space.

SORBENTS

See pages
327-330

Today's workplace safety culture demands sorbents of varying absorbency ranges, sizes, and life spans. Choose from a full line—to handle drips, spills or puddling of water-, chemical or petroleum-based flows. You'll find sorbents on roll, pad or sheet form, sorbents that conform to uneven surfaces, and sorbents of differing strengths for handling foot traffic to industrial vehicles.

**A. LYSOL® Neutra Air® Sanitizing Spray**

Destroys odors in the air and kills 99.9% of odor causing bacteria at the source when used as directed, so odors do not come back. **GREEN TIP**

For living and working areas, light scents such as lavender are refreshing without overpowering the senses. For persistent odors, try a clean or fresh scent. Bathrooms and other areas of consistently strong malodors can benefit by room deodorizers or air fresheners with a little more kick to them. Try scents with hints of floral or cinnamon.

Many of today's air fresheners contain counteractants which eliminate odors, leaving a fresh scent. Sanitizers kill bacteria that can cause offensive odors. Timed air fresheners release premeasured product into the air automatically.

SPACE SAVER

Let the fragrance of your restroom enhance your facility, not detract from it. Daily restroom cleaning with disinfectants and the application of an odor counteractant will eliminate many odor problems. For restrooms that continue to have odor troubles, heavy-duty cleaning of grout, walls and ceilings using a neutralizer, applying disinfectants and enzymes, as well as using a combination of odor control devices might be required to get to the root of the problem.

GREEN TIP

Water is a precious resource. In many parts of the world, including large parts of North America, it is also scarce and expensive. Improving conservation and good landscaping methods can reduce your reliance on water. Switching to ultra low-flush toilets, using flow-restrictive devices on sink taps, low-flow showerheads and other water conserving fixtures can help. If you are watering your landscaping, use micro-irrigation to supply water in non-turf areas and upgrade to state-of-the-art irrigation controllers and self-closing nozzles on hoses.

\$\$\$SAVER

Your investment in a quality auto-flush system will yield cost savings, increased equipment longevity and cleaner facilities. Installation of auto-flushers typically takes an hour or less, installing over existing, manual flush hardware. Current technology provides that sensor batteries will not require replacement until 30,000 flushes or more. Additionally, auto-flushing eliminates the need for manual flushing, ensuring longer equipment life—since flush handles are often stepped on due to sanitary considerations. Finally, the more frequently used lavatory facilities will benefit by greater cleanliness, as auto-flushing occurs after every use of a commode.

ENERGY SAVER

Assuming your company operates on a 10% profit margin, for every extra dollar your company spends on energy costs, it needs to generate \$10.00 worth of revenue. Make sure this is factored into your annual budget, and plan for energy savings.

An optimal move is installation of controlled "smart" lighting, whereby rooms remain lit when activity is sensed, followed by a timed shutdown when no one is present.

Another way to save in electricity costs is to switch off fluorescent light banks when natural lighting (daylighting) is adequate in an unoccupied, open office area. In new or remodeled top floor offices, skylights with enhanced ability to maximize and focus outside light are huge cost savers, and add to safety in hallways and corner areas as well.

DUO HAND
SANITIZER REFILLSSee page
107

Dial® Foam Hand Sanitizer refills are the easy, hassle-free way to change out your Dial® Duo dispensers from foam soap to foam hand sanitizer. Dial hand sanitizers kill 99.99% of germs instantly; the formula is safe, gentle under repeated use and leaves skin soft, smooth and refreshed without stickiness. When ordering refills, choose Touch-Free or Manual system. Also, it's great to note that Manual dispensers can easily be converted to Touch-Free and Touch-Free to Manual, without removing from the wall!

DIAL® PROFESSIONAL DUO
DISPENSER SYSTEMS

Dispensers come in both touch free and manual versions and can easily be converted from one system to the other without having to remove the entire dispenser from the wall. Simply open the front of the dispenser and replace the engine. View window prominently displays the soap brand in the front and the translucent backplate makes it easy to view soap level. Soap refills have colored band to identify the proper system: black band for manual and red band for touch free.

DIAL COMPLETE® ANTIMICROBIAL FOAMING HAND SOAP SYSTEM

Cost effective, foaming dispensing system provides a high level of broad spectrum germ killing action to help stop the spread of infection. Patented Activated Triclosan™ technology significantly reduces the level of germs left on hands after handwashing over 25 times more effective than other antibacterial soaps. Effective against MRSA, VRE, staphylococcus, streptococcus, E. coli and salmonella. Mild, hypoallergenic foaming soap formulas contain aloe and glycerin to leave skin soft, smooth and refreshed. High volume lather uses less soap. NSF Certified for an E2 rating.

A. Dial Professional® Foaming Soap Dispenser

Soap level is clearly visible through translucent dispenser. Push type dispenser is ADA Compliant. Holds 1 liter refills (sold separately). ABS plastic construction. Includes both screw mount hardware and an adhesive back mount option. 5⁹/₁₆"w x 4⁵/₈"d x 9³/₈"h.

GREEN TIP

If you have remote locations or places where there is infrequent use of hot water, you might consider a point-of-use water heater for energy savings. They make hot water instantly available, but only use electricity when needed.

SPACE SAVER

Simplify. Do an audit of your cleaning solutions and products, and use fewer products for more purposes. At a Yellowstone National Park project, auditors identified many benefits of standardizing select products. Stocking fewer products resulted in better inventory control and reduced storage needs, as well as the elimination of old products that might be used improperly.

DIAL COMPLETE® FOAMING HAND SOAPS

Provides a high level of broad spectrum germ killing action to help stop the spread of infection. Its patented Activated Triclosan™ formulation provides 25 times better germ kill than other antimicrobial soaps. Effective against MRSA, VRE, staphylococcus, streptococcus, E. coli, and salmonella. Its hypoallergenic foam is excellent for very frequent hand washing and contains skin soothing conditioners like aloe and glycerin to leave hands feeling soft, smooth and refreshed. Use in any commercial setting, including healthcare facilities, schools, offices, foodservice and day care. NSF Certified for an E2 rating.

Antibacterial Foaming Hand Wash

Hospital strength formula is over 10 times more effective at killing germs than ordinary soap, yet mild enough for frequent use. Activ Foam™ system provides instant lather that rinses clean and leaves a fresh scent.

GREEN TIP

New plastic from polymers created from corn can fulfill many of the functions of petroleum plastic. In addition, corn is an annually renewable resource that is cleaner and cheaper to acquire than petroleum. With less landfill waste and cleaner manufacturing, new plastics can go far to creating a sustainable future.

People Make Our Workplaces Work.

If you're concerned about a healthier, safer, and more productive workplace, you've come to the right place. Only KIMBERLY-CLARK PROFESSIONAL* offers you the breadth of options and level of trust created by our quality brands and products. They're "household names" known by millions all over the world, and there are good reasons why. The quality products you'll see here not only satisfy your users, they help you create a healthier away-from-home environment for you and your employees. Why this focus on workplace health? Because we are in the people business, and people are the most important asset.

Exceptional Workplaces*

The background of the entire page is a blue-tinted photograph. It shows several large rolls of paper, likely toilet paper or paper towels, stacked and arranged. A paper dispenser is visible in the upper right, partially obscured by the rolls. The lighting creates soft shadows, giving a sense of depth to the paper products.

GREEN TIP

We've all heard about the environmental concern about "old-growth forests" but did you know that most paper, cardboard and products made from these are from trees that were grown as a renewable resource? Forest products—other than those from unique environments like old-growth forests—can be re-seeded, re-grown, re-harvested and recycled. This often makes products made of paper or cardboard a greener choice than plastics and foam. Of course, the best solution is always to reduce and reuse when possible, but using renewable resources can help too.

SPACE SAVER

When you're storing paper supplies, divide vertical space for efficiency and stability. Rather than stacking tall piles of packages that are likely to topple over, subdivide supplies with additional modular units on top of each shelf.

GREEN TIP

The Environmental Protection Agency offers guidance for government purchasing of truly eco-friendly products, and the same important principles apply in the private sector.

- Environmental measures should become part of normal purchasing practice, right alongside product safety, price, performance and availability.
- Environmental preferability is tied to pollution prevention, which strives to eliminate or reduce risks to human health and the environment.
- Pay attention to multiple attributes that factor into the product's entire life cycle, from production through disposal.
- Consider the scale and reversability of the environmental impacts, the degree of difference among the impacts of competing products or services, and the overriding importance of protecting human health.
- Comprehensive, accurate, and meaningful information about the environmental performance of products or services is necessary to making green choices.

GREEN TIP

Cleaning for appearance only is a perfectly acceptable standard for spaces including offices and retailers. By interspersing water-only and detergent cleaning procedures, you can reduce overall maintenance expenses and go green as you limit or eliminate use of harmful chemicals. A facility might require a deeper scrubbing weekly or monthly instead of daily, alternating with water-only cleanings to effectively clean visible grime — giving floors an overall polished look, while washing away any residual detergent and preventing unwanted buildup.

GREEN TIP

Some of the most beautiful and low-maintenance landscaping these days is also what is known as "xeriscaping," or landscaping that does not require supplemental watering. As fresh-water resources are becoming scarcer and more expensive worldwide, you will see more commercial buildings moving toward using drought-tolerant plants and groundcovers. Not only does xeriscaping lower water bills, it requires less maintenance and little or no lawn mowing. Although it requires a bit more startup work than laying sod, the benefits endure for years.

**A. EchoMop Looped End Wet Mop Heads**

The first mop head made from recycled PET plastic bottles, contributing to reduced landfill waste, energy consumption and impact on greenhouse gases. EarthSpun® fibers are manufactured from 30% post consumer P.E.T. plastic bottles. Product contains 30% post consumer and 97% total recovered material. Longer lasting, lower linting mop head offers 20% better performance than competitive all synthetic wet mop yarns. Absorbs more than 4.4 times its weight in water and releases almost 30% upon wringing. Washable and fast drying. Dries quickly 90% dry after only the spin cycle of the washer; air dries 100% overnight. Wide 5 in. mesh headband works with clamp, quick change or jaws mate handles (sold separately). 12 mop heads per case.

B. Enviro Clean Looped Mop Heads

Patented, mildew resistant DuPont® material is designed to meet cleanroom (Class 1000) applications for lint reduction. Ideal for cleanup of foodservice areas, hospitals and oil and hazardous chemical spills. Cotton/synthetic blend fibers are interlocked for strength, less linting and launderability. Fibertac process cut end mops last three times longer than comparable cut end mops. Durable double sewn tailband. Narrow 1¼ in. canvas tape headband works with clamp style mop handles (sold separately). 12 mop heads per case.

C. Patriot Mops

Made from a unique yarn blend whose source gives them their distinctive color. Derived from the manufacture of military uniforms, this 100% recycled yarn is a blend of cotton and synthetic fibers. The presence of Kevlar® in the recycled material provides added toughness and abrasion resistance. Headband and tailband are made of virgin material. Product contains 97% total recovered material. Yarn is highly absorbent and durable enough for heavy duty cleaning. Tailband helps reduce streaking, snagging and loose strings. Launderable and reusable. Good for heavy cleaning. Reduces labor. Made in the USA. 12 mop heads per case.

GREEN TIP**Bamboo: A Rapidly Renewable Resource**

Raw materials that renew quickly can assist with creating a sustainable future. Bamboo can be harvested in five to seven years, whereas trees can require 10 to 50 years before harvesting. Bamboo is sturdy enough to be made into flooring and other products traditionally reserved for wood, such as cutting boards, kitchen accessories, and more. As it functions comparably to wood but renews up to 10 times faster, bamboo is a viable material alternative for a sustainable future.

Product Type

Benefit Feature

Cut-end wet mop heads

Mop heads with cut ends are available in designs that fasten to, screw-in, clamp or grip handles. They're available in cotton, synthetic blend and all-synthetic fibers, with value-priced and premium yarns. *(Find these on page 208)*

Looped end mop heads

Mop heads with looped ends offer multiple benefits, as the looped design reduces tangling, avoids unraveling and fraying, and lessens linting. The addition of a tailband helps prevent even more tangles. A tailband also provides more floor coverage with each stroke and less streaking, for faster mopping and reduced labor. *(Find these on pages 209-211)*

Cotton

An economical choice, a cotton mop head often requires the tradeoff of some break-in time. Cotton absorbs well. Consider cotton absolutely suitable for general cleaning purposes. *(Find these on pages 208-212)*

Synthetic/ synthetic blends

Pure rayon offers immediate absorbency and quick release, making it a smart choice for finishing floors, disinfecting and application of chemicals. Blended fibers can deliver up to five times the absorbency of 100% cotton and lend well to general cleaning, disinfecting and application of chemicals. Synthetic and synthetic blend mop heads withstand repeated laundering with minimal or no shrinkage, and are better suited to heavy cleaning when compared to cotton. *(Find these on pages 208, 211-212)*

Microfiber

The leading edge of mop head fibers, microfiber cleans more effectively than cotton and offers far greater durability through multiple launderings versus synthetic blends. By using microfiber, you can reduce and often eliminate cleaning chemicals. Microfiber lends itself to tube designs, and tube mop heads reduce drag, easing labor. Lightweight yet highly absorbent, microfiber mop heads can help lower the risk of injury. *(Find these on pages 211, 213, 226-227)*

Sponge

Sponge mops include lever functionality for easy wringing of the soaked mop head. *(Find these on page 212)*

GREEN TIP

Think about greener solutions, not perfect solutions. It is human nature to feel overwhelmed by the challenges of taking care of something as big as the "environment". But we aren't going to solve the problems by becoming perfect overnight. We will do it one step at a time. Once you have a commitment to do your part you will find that there are lots of opportunities to make small differences. Some will be very easy decisions, like choosing the greener alternative or picking a vendor who offers green options. You can make a difference right now, one choice at a time.

\$\$\$SAVER

The San Francisco Unified School District implemented a program that included HEPA filtered vacuums, new mopping systems, entry mats and custodial staff training. Prior to the project, these schools received numerous complaints of respiratory problems and requests for periodic deep cleaning. Since the project was initiated, such complaints or requests have been eliminated.

Industrial

Industrial upright vacuums are as heavy-duty as their name implies. Choose for heavy-duty cleaning in offices, government buildings and hotels. Select a vacuum with a wide cleaning path to clean large, minimally furnished rooms in less time; other widths are available for other layouts. A great choice for day cleaning, quiet operation features are a real advantage. Look for large-capacity shake-out bags or dust cups and extra-long power cords to maximize cleaning efficiency, save time and reduce maintenance. *(pages 252-253)*

Filtration

Choose HEPA uprights to improve indoor air quality. A HEPA vacuum filter or bag retains 99.97% of allergens as small as 0.3 microns – or about 240 times smaller than a human hair. Items with HEPA classification range from vacuum filters and disposable dust bags, to completely sealed systems that force all of the air leaving the vacuum through a HEPA exhaust filter. Hospitals, schools and certified green buildings are ideal environments for HEPA cleaners. *(pages 249-253)*

Lightweight

A lightweight vacuum is built for quick, frequent cleanups and maneuverability. In spaces with furniture and other obstacles, this type is ideal for hotels, doctors' offices and schools. Choose from options such as cordless sticks and compact deep cleaners that deliver the same powerful performance of a full-sized machine. Many lightweight cleaners offer superior filtration, onboard tools and carpet height adjustment controls. *(pages 250-251)*

Backpack

Backpack vacuums offer mobility as well as quiet operation. Back and shoulder straps secure the cleaner to the maintenance worker, adding to comfort and ease of carrying. Choose closed bag systems and highly effective multi-stage filtration, in which multiple layers of material thoroughly remove soil particles. HEPA filtration renders a backpack vacuum appropriate for environments where indoor air quality is a concern. Many models are surprisingly lightweight. Use in spaces with large expanses of bare floors and areas containing an abundance of furniture such as office buildings, schools and hospitals. *(page 257)*

Canister

Canister vacuums are flexible and compact, making them ideal to reach into inaccessible areas that are often hard to clean. Easy, powerful detail cleaning is enhanced by attachments including upholstery tools, dusting brushes and wand extension. Models with shoulder straps transport more easily and HEPA-ready units help improve indoor air quality. Choose canister cleaners for spaces that demand detail cleaning and those with an abundance of hard surfaces and stairs, such as schools, hospitals, hotels and office buildings. *(page 256)*

Carpet Extractors

Carpet extractors come in many shapes and sizes, from spot cleaners to full-size models with powered brushes to deep-clean large carpeted areas. Features like revolving brushrolls, fingertip controls, metal cleaning wands and large-capacity solution tanks add value. Ideal for use in spaces with high-traffic areas like offices, hotels and government buildings. *(pages 259-260)*

Floor Machines

Get hard surfaces to shine in high-traffic areas in schools, government buildings and hospitals. These units are designed to maintain and restore hard floors with the use of different pads or brushes for scrubbing, stripping, buffing or polishing. For this heavy-duty work look for quality construction. UL Approved models offer durable steel gears and parts. Smooth operation features, multi-speed motors and a safety shutoff switch, add to ease of use. *(pages 262-263)*

Glove Types

Disposable/Single Use – Gloves from these materials are economical, often disposable and appropriate for general use. Users can find these materials made into gloves that are approved for a variety of settings.

Knit – Knit gloves offer comfortable fit and good flexibility and can also be used as a liner for extra protection. Look for gloves featuring PVC dots for extra grip.

Driver's – Excellent strength and durability combined with comfort and protection. Look for designs with shirred or elasticized cuffs when you are concerned about keeping dirt and debris out of the glove. Provides abrasion resistance, dexterity, durability and comfort.

Canvas & Fabric – Provides durability, dexterity and comfort. Look for palms featuring PVC dots or natural or synthetic hide when greater grip is needed. These gloves can typically be laundered. When sturdy synthetic fabric is used, durability is increased along with resistance to abrasions, cuts and punctures.

Supported/Dipped – Degrees of protection vary, with coatings to protect against solvents and chemicals and provide protection from abrasions, punctures and cuts.

Specialty – Box handling and other heavy-duty applications that might require exceptional dexterity, grip, and imperviousness to liquids, impact cushioning and other protection. Specialty gloves feature palms, coatings and materials and thicknesses designed for the most demanding users.

We've Got it Covered: Eye Protection

Personal protective eyewear, such as goggles and safety glasses, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in hospital ERs and more than 100 of these injuries result in a day or more of lost work. The majority of these injuries results from small particles or objects striking or abrading the eye.

When choosing eye protection, you'll want to analyze and identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination of a faceshield with glasses or goggles as secondary protection.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision needs to come into play, with safety glasses that allow the user to wear their own glasses underneath.

You'll want to see good eye protection at work in your environment. Make informed choices and be safe.

www.cdc.gov/niosh/topics/eye

Safety Glasses

Safety glasses protect against general impact. However, the speed of the impact must be taken into consideration. The higher the velocity, the more likely the safety glasses can be dislodged. In this case, goggles or a faceshield may be a better choice.

Goggles

Goggles are available in two styles. Direct vented or indirect vented.

Indirect Vented goggles are for protection against vapors, chemicals, liquids and dust.

Direct Vented goggles provide air flow to the eye area but are only approved for protection against particulates. These are for jobs such as grinding or cutting where dust is an issue.

Faceshields

A full faceshield is the best option for workers exposed to high speed flying particles or chemical splashes. These must be used in conjunction with safety glasses or goggles to protect against secondary hazards.

UV Protection

Crucial for workers exposed to ultraviolet radiation such as outdoor workers and welders.

Lens Coatings/Colors

Eye protection is available in a variety of coatings and lens colors.

Hard-coated for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist for jobs where workers are exposed to extremes of temperature or warm humid environments.

Clear Lenses for indoor or outdoor applications in below normal light conditions.

Gray or Brown Lenses for outdoor use where above average light is available.

Amber Lenses for applications where light conditions are below normal or where enhanced contrast is needed.

Get Some Air: Using Respirators

The National Institute of Occupational Safety and Health, NIOSH, collaborates with industry partners and other government units to develop respirator standards in accordance with government regulations. Look for the NIOSH code that describes the standard appropriate to your workplace. Respirators reduce worker exposures when engineering control systems, such as ventilation and scrubbing systems, cannot. Employers can require workers to wear respirators to perform some tasks. Approximately five percent of all U.S. workers, in about 20 percent of all work establishments, wear respirators at least some of the time.

Particulate Respirators

Particulate filters are available in disposable or reusable models with replaceable filters. They cover the nose and mouth and provide protection from airborne particles including dust, mist, liquids and some fumes but not gases or vapors. They are rated by NIOSH according to what and how much they filter out. The ratings have a letter and number.

N – not oil proof

R – oil resistant (up to 8 hours)

P – oil proof (beyond 8 hours)

The numbers refer to the percentage of one-micrometer particles removed during trials. For example, a 95 rating indicates that the filter removes 95% of particles from the air.

Chemical Cartridge/Gas Mask Respirators

Chemical Cartridge/Gas Mask Respirators contain replaceable carbon filters that absorb gas and vapor from the air. Reusable masks seal tightly around the edges to block out unfiltered air. Choose from Half-Mask, covering only nose and mouth, or Full-Mask, covering your entire face.

Several types of cartridge are available. These include chemical (blocks out vapors but not particles) and dual cartridge (includes a replaceable pre-filter for particulates).

Product Type

Benefit Feature

Floor Squeegees

Clears floors of water and much more (page 348). Use to clear away large volumes of mud, snow, slush, and other debris. Squeegee frames are made with galvanized steel to withstand the heavier workload. Nylon inserts (page 348) adapt squeegees for use with Acme-threaded handles.

Sanitary Squeegees

Available as standard or brush/squeegee combination (page 348). Ideal for hospitals, bathrooms, kitchens, dairies, swimming pools and other areas where cleanliness is key. Durable polypropylene construction resists acids.

Water Wands

Wash and wipe away at the same time! Water Wands (page 347) combine with aluminum handles (page 347) to wash thoroughly and reach difficult spots. Use to clean grout, uneven surfaces, tiling, and more. After the washing is done, the squeegee's rubber blades whisk away standing water, leaving the surface finger dry. Adapters are available (page 351) to create Acme-compatible sockets on the wands, allowing for the use of tapered or threaded handles.

General-Duty Squeegees

Perfect for washing and wiping glass. Allows for easy handling and gentler use on fragile surfaces. Use the sponge for scrubbing, flip the squeegee over, then use the rubber blade for wiping water away. For use on vehicle windows, mirrors and smooth surfaces that need cleaning and instant water removal (page 349).

Window Squeegees

Wipe away water with a longer reach. The soft, thin rubber blade clears water from any smooth, flat surface and works perfectly on windows. Handle allows squeegee to be attached extension wands to reach higher areas (pages 349-350).

Quality Tools for Smart Cleaning

WATER WANDS

Digs deep into tile crevices and uneven floor surfaces to remove liquids, leaving floor finger dry. Twin moss foam rubber blades. Choose from standard or heavy duty squeegee with rugged galvanized steel construction and splash guard. Tapered socket; use with Pro aluminum handles (sold separately). GREEN TIP

The EPA estimates that there are 136 million tons of construction and demolition debris generated in the U.S. annually, or 2.8-lbs./ person/day. If your building is undergoing any kind of rehabilitation or construction, keep in mind that there are many government organizations and recycling facilities that will assist you with recycling or reusing excess materials and some kinds of demolition debris. You can be the one that makes these materials available for reuse and keep them out of our landfills and waste streams.

Product Type

Benefit Feature

Cube Trucks

Use these durable and versatile trucks for a variety of bulky, load-carrying tasks including waste collection, material transport and laundry. Available in four capacities. *(Find these on page 355.)*

Tilt Trucks

This truck maximizes maneuverability. The design matches the name: these trucks make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Wheels and the overall profile help protect surroundings. Consider your need for the lid option. *(Find these on pages 355-356.)*

Platform Trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items, less when loads are more well-balanced. Some platform trucks offer work-height surfaces. *(Find these on pages 354, 357.)*

Hand Trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. *(Find these on page 354.)*

Convertible Trucks

Change configurations to use one truck in multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. *(Find these on pages 354, 357.)*

Smarter Waste Stream Management

Recycling Systems that Work

Improve productivity and reduce costs with waste management solutions from Rubbermaid Commercial Products. From BRUTE® to Slim Jim®, our utility refuse products feature superior-quality materials and heavy-duty construction for long product life. Facility managers today understand that recycling helps conserve our natural resources and improve quality of life. Effective solid waste management also makes good business sense. All of Rubbermaid metal waste containers are made from post-consumer recycled content (30% for steel and 70% for aluminum). Rubbermaid helps you recycle for a better tomorrow.

SCRAPER MATS

See pages

242-244

Did you know that 80-90% of all dirt that enters a building is tracked in on people's feet? Using a Scraper Mat can save money on cleaning as well as on floor maintenance and repair. Resilient vinyl loops on the mat's surface scrape dirt and moisture off shoes, trapping them in the mat for later removal. Shake, rinse or vacuum out the mat, and the dirt is gone!

Can Liner Color Black, white and natural are the most common can liner colors. The "see through" quality of natural bags makes them ideal for environments where transparency is required for security purposes. If transparency is not required, black or white bags are preferred. Special color can liners (red, yellow, blue, brown, gray) can be used for at a glance content identification. For example, red bags are often used to indicate hazardous waste while blue bags may identify recyclable waste.

Can Liner Roll Types A *bulk pack* consists of can liners that are separately folded, then stacked on top of one another or are folded together. A *cored roll* consists of can liners that are rolled together on top of a cardboard cylinder (similar to paper towel rolls). A *coreless roll* consists of can liners that are tightly rolled together without a cardboard cylinder. The can liners on both cored and coreless rolls may be connected by perforated edges or interleaved for nonperforated dispensing.

WASTE RECEPTACLES pages 371 379

Can't Find It? Call Us!

Choose from two types of plastics

Linear Low-Density (LLD)

Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears, either from the surrounding environment or through transportation to disposal units. (Find these on pages 384-386)

High-Density (HD)

When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits, performing well with waste that is heavy or has sharp edges, such as glass or other industrial items. (Find these on pages 387-390)

Strength grade and gauge

Throughout this section, you'll see items listed by strength grades as well as gauge. Here's how the two measures relate. Refer to this data to make the appropriate choice for your applications.

Light — Use for crumpled paper, cups and light waste.

Medium — Appropriate for packaging waste, wet paper and similar mixed trash.

Heavy — Choose for light wood, metal scraps and wet cardboard.

Extra-Heavy — Select for when trash is consistently heavy, wet or sharp.

Super/Extra-Heavy — Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Gauge Equivalents

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauges.

Strength Grade	Linear Low-Density Mil Gauge	High-Density Micron Gauge
Light	.35 .44	5 9
Medium	.45 .57	10 12
Heavy	.58 .69	13 14
Extra Heavy	.70 .89	15 17
XX Heavy	.90 1.14	
Super	1.15 1.39	
Super Heavy	1.40 up	18 24

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom seals

Star Seals — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

Flat Seals — Holds more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

Gusset Seals — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

\$\$\$ SAVER

Hand washing is recognized by the Centers for Disease Control and Prevention (CDC) as one of the most important means of preventing germs from spreading. On the flu alone, Americans spend \$1.3 billion on direct medical costs. Lost productivity in the workplace can add another \$15 billion to the annual tab.

KLEEN-PAILS®

See page
218

For health and safety purposes, it is important to differentiate between cleaners for foodservice surfaces and other cleaners. Other surface cleaners contain higher and more toxic amounts of cleaning agents. Thus, using the wrong cleaner on a foodservice surface could have severe consequences. Kleen-Pails® meet HACCP guidelines to help separate containers for food and non-food surface cleaning.

GREEN TIP

Composting is the controlled, biological breakdown of solid organic waste material, and the conversion of it into a substance called compost. Composting requires the management of air, temperature, moisture and microorganisms, and the environmentally-friendly process can transform large quantities of waste products into much smaller amounts of beneficial materials, in a relatively short time. Compostable hot cups and lids are made with renewable resources like corn, with the compost often being reused by growers.

GREEN TIP

Individuals can save energy for the future and save money in the present with easy measures. For example, adjust home thermostats to reduce heating or cooling while the residents are out. Or form a carpool to save money on gas while reducing carbon emissions from cars. Also, consider small home electronic adjustments. Some electronic devices continue to draw power even when switched off. Either unplugging appliances when not in use or plugging devices into a smart power strip will cut down on wasted energy. Consider these small steps to save money and energy both for now and later.
