Symbol Legend

Because there is no universally accepted standard to designate products as environmentally preferable, we have adopted the Enviro-conscious symbol to highlight products identified by their manufacturer as having one or more of the following attributes: reduced VOCs, compostable, biodegradable, recyclable, contains recycled content, or other environmental attributes that make the product[†] less harmful to the environment or humans, when compared to its traditional counterparts. Many of the products marked with the Enviro-conscious logo have been endorsed by third-party certifying organizations, such as Green Seal, the Carpet & Rug Institute, EcoLogo and the Biodegradable Products Institute; where applicable, third-party certifications are noted in the product descriptions. Please note that we do not independently verify the environmental attributes but instead rely on the respective manufacturer and/or third-party certifying organization. A "green dot" ● at the end of a stock number indicates the product is Enviro-conscious.

[†]These environmental attributes refer to the products themselves and not the processes for manufacturing and transporting the products.

Manufacturers may submit their products for evaluation by Green Seal™. Those that comply with the requirements are authorized to use the Green Seal™ Certification Mark on their products.

Green Seal™ is dedicated to safeguard the environment and promotes environmentally responsible products and services. www.greenseal.org

The CRI (Carpet and Rug Institute) Seal of Approval program identifies effective carpet cleaning solutions and equipment that clean carpet right the first time and protect a facility's carpet investment. Not all products clean well enough to earn the Seal of Approval distinction, so look for the blue and green CRI Seal of Approval as proof that you are purchasing or using a quality product. The CRI Seal of Approval logo is a trademark of the Carpet & Rug Institute. www.carpet-rug.org

Dilution Chart

Use this chart as a guideline for diluting the products sold in this catalog. 1:x means 1 part concentrate to x parts water. For example, to make a quart of solution in a 1:15 dilution, mix 2-oz. of concentrate into 30-oz. of water. (NOTE: To minimize foaming, fill the container with water before adding the concentrate. Then stir thoroughly.)

MONEYSAVER

Your investment in a quality auto-flush system will yield cost savings, increased equipment longevity and cleaner facilities. Installation of auto-flushers typically takes an hour or less, installing over existing, manual flush hardware. Current technology provides that sensor batteries will not require replacement until 30,000 flushes or more. Additionally, auto-flushing eliminates the need for manual flushing, ensuring longer equipment life—since flush handles are often stepped on due to sanitary considerations. Finally, the more frequently used lavatory facilities will benefit by greater cleanliness, as auto-flushing occurs after every use of a commode.

HERE'S TO HEALTH: Skin Care Solutions

Product Type Uses

Hand Soaps

Hand soaps are the tried and true solution to remove soils and germs from hands when water is readily available. Many options are available including: traditional, anti-bacterial, foam, scented and colored. Hand soaps are ideal for bathrooms, break rooms and kitchens. (Find these on pages 116–154)

Instant Hand Sanitizers

Instant hand sanitizers are great at killing germs that make people sick. Usually alcohol based, these products kill germs quickly without the need for water. Many sanitizer options are available including bottles, dispensers, wipes, foams and gels. Use sanitizer to supplement routine hand washing because it helps reduce the risk of infections. Instant hand sanitizers are ideal in healthcare, foodservice, education and office facilities, as well as high traffic public areas. (Find these on pages 107–115)

Manual Dispensers

Manual dispensers are economical dispensers that get the job accomplished. These dispensers are ideal for high traffic areas. Manual dispensers are best suited for rugged placements such as mechanic shops, industrial facilities and warehouses. (Find these on pages 112, 120, 126)

Touch-Free Dispensers

Touch-free dispensers allow users to receive the proper amount of product without touching a possibly contaminated dispensing unit. Germs live everywhere and these dispensers eliminate users touching a hotbed for germs – the push button on manual dispensers. Touch-free dispensers usually require batteries to operate. (Find these on pages 109, 110, 117–120, 134)

Sanitizing Wipes

Sanitizing wipes are perfect for cleanup of hands while killing germs that make people sick. Pre-moistened wipes are great for break rooms, cafeterias and restaurants. Wipes are available in canisters and pre-wrapped individual packets. The pre-wrapped packets are small, making them ideal solutions for on-the-go sanitizing. (Find these on pages 113, 465)

Heavy-Duty

Heavy-duty hand cleaners are the workhorses that remove tough soils. Each product is specialized to remove specific soils such as adhesives, carbon black, epoxies, gasoline, tar, grease, dirt, oil, paint, sealants and urethanes. It is best to choose the right product for the soil that needs to be removed. Check the product description for more information about its cleaning power. Heavy soils can be tough on hands and a separate skin conditioner is recommended. (Find these on pages 147–153)

SPACE SAVER

Simplify. Do an audit of your cleaning solutions and products, and use fewer products for more purposes. At a Yellowstone National Park project, auditors identified many benefits of standardizing select products. Stocking fewer products resulted in better inventory control and reduced storage needs, as well as the elimination of old products that might be used improperly.

Foam Soaps

DIAL COMPLETE® FOAMING HAND SOAPS

Provides a high level of broad-spectrum germ-killing action to help stop the spread of infection. Its patented Activated Triclosan™ formulation provides 25 times better germ-kill than other antimicrobial soaps. Effective against MRSA, VRE, staphylococcus, streptococcus, E. coli, and salmonella. Its hypoallergenic foam is excellent for very frequent hand washing and contains skin soothing conditioners like aloe and glycerin to leave hands feeling soft, smooth and refreshed. Use in any commercial setting, including healthcare facilities, schools, offices, foodservice and day care. NSF Certified for an E2 rating.

Antibacterial Foaming Hand Wash

Hospital-strength formula is over 10 times more effective at killing germs than ordinary soap, yet mild enough for frequent use. Activ-Foam™ system provides instant lather that rinses clean and leaves a fresh scent. Product is 86.5% biodegradable in 28 days. Packaging contains 25% post-consumer material and 75% total recovered material. AP Non-Toxic Certified. Certified compostable by the Biodegradable Products Institute.

ENERGYSAVER

Assuming your company operates on a 10% profit margin, for every extra dollar your company spends on energy costs, it needs to generate \$10.00 worth of revenue. Make sure this is factored into your annual budget, and plan for energy savings.

An optimal move is installation of controlled “smart” lighting, whereby rooms remain lit when activity is sensed, followed by a timed shutdown when no one is present.

Another way to save in electricity costs is to switch off fluorescent light banks when natural lighting (daylighting) is adequate in an unoccupied, open office area. In new or remodeled top floor offices, skylights with enhanced ability to maximize and focus outside light are huge cost savers, and add to safety in hallways and corner areas as well.

ENVIROTIP

Water is a precious resource. In many parts of the world, including large parts of North America, it is also scarce and expensive. Improving conservation and good landscaping methods can reduce your reliance on water. Switching to ultra low-flush toilets, using flow-restrictive devices on sink taps, low-flow showerheads and other water conserving fixtures can help. If you are watering your landscaping, use micro-irrigation to supply water in non-turf areas and upgrade to state-of-the-art irrigation controllers and self-closing nozzles on hoses.

GREENTIP

The Environmental Protection Agency offers guidance for government purchasing of environmentally preferable products, and the same important principles apply in the private sector.

- Environmental measures should become part of normal purchasing practice, right alongside product safety, price, performance and availability.
- Pay attention to multiple attributes that factor into the product's entire life cycle, from production through disposal.

- Consider the scale and reversability of the environmental impacts, the degree of difference among the impacts of competing products or services, and the overriding importance of protecting human health.
- Comprehensive, accurate, and meaningful information about the environmental performance of products or services is necessary to making green choices.

Sponges

Choose from light-, medium- and heavy-duty sponges to attack a range of messes indoors and outdoors. Many sponges feature absorbent cellulose on one side with a scouring pad on the other. Sponges are also safe to use on a variety of surfaces, such as ceramic fixtures, pots, pans, kitchen and bathroom surfaces. They last longer by resisting odors, staining and crumbling caused by bacteria on the sponge.

Food Storage Containers & Lids

Food storage containers keep prepared foods, fruits, condiments, veggies and ingredients within easy reach. Features like graduated measurements and writable areas for dating and labeling add to their economy and utility, as well as snap-tight or locking lids which provide an airtight seal that helps prevent spoilage and leakage. Food lasts longer and your dollar goes further with food storage containers.

GREEN TIP

"Green cleaning" refers to the use of products and procedures that are less harmful to humans and the environment than others serving the same function. The Green Seal™ Environmental Standard for Commercial and Institutional Cleaning Services (GS-42), establishes environmental requirements specifying green chemicals, supplies and equipment as well as cleaning procedures. It also mandates employee training and communication with building owners and occupants.

GREEN CLEANING PROCESSES

- Carefully plan and time the chemical cleaning process. Keep a schedule of events and plan to disinfect high-traffic areas and entrances more frequently than those areas where access is limited.
- Identify occupants with special needs and implement a plan sensitive to those needs. For instance, if there are allergies to the chemicals used in cleaning, or any other allergies, be sure to design the cleaning process to avoid exposing occupants. In order to identify effectively, get the word out and invite anyone with concerns to notify the staff of their specific needs.

- Reduce chemical waste by using dilution methods as instructed by the manufacturer, tracking quantities of chemicals used and using appropriate dispensing technology to limit overuse of chemicals.
- Improve indoor air quality by maintaining sufficient outdoor ventilation. Ventilate properly when chemicals are being used in cleaning. Design a ventilation system where airflow is properly reaching the interior of the building.
- Chemicals aren't the only things releasing VOCs. Certain cleaning equipment releases harmful emissions. To reduce the impact of these effects, properly maintain your equipment and/or replace with VOC Compliant equipment.
- Disinfection should be limited to surfaces where pathogens collect, such as door handles, bathrooms and other high-traffic surfaces where there is much hand contact.

Mesh bag minimizes tangling and protects mop heads during laundering.

A. EchoMop Looped End Wet Mop Heads

EarthSpun® fibers. Longer-lasting, lower-linting mop head offers 20% better performance than competitive all-synthetic wet mop yarns. Absorbs more than 4.4 times its weight in water and releases almost 30% upon wringing. Washable and fast drying. Dries quickly—90% dry after only the spin cycle of the washer; air dries 100% overnight. First mop head made from recycled PET plastic bottles, contributing to reduced landfill waste. EarthSpun® fibers are manufactured from 30% post consumer P.E.T. plastic bottles. Product contains 67% total recovered material. Wide 5-in. mesh headband works with clamp, quick-change or jaws mate handles (sold separately). 12 mop heads per case. ♻️

C. Patriot Mops

Made from a unique yarn blend whose source gives them their distinctive color. Derived from the manufacture of military uniforms, this yarn is a blend of cotton and synthetic fibers. The presence of Kevlar® in the recycled material provides added toughness and abrasion resistance. Headband and tailband are made of virgin material. Yarn is highly absorbent and durable enough for heavy-duty cleaning. Tailband helps reduce streaking, snagging and loose strings. Launderable and reusable. Good for heavy cleaning. Reduces labor. Yarn is made with military uniform fabric clippings. The material is new material created as by-product of the uniform making process. Yarn is 100% recycled material. Headband and tailband are made of virgin material. Product contains 97% total recovered material. Made in the USA. 12 mop heads per case. ♻️

ENVIROTIP

Think about greener solutions, not perfect solutions. It is human nature to feel overwhelmed by the challenges of taking care of something as big as the "environment". But we aren't going to solve the problems by becoming perfect overnight. We will do it one step at a time. Once you have a commitment to do your part you will find that there are lots of opportunities to make small differences. Some will be very easy decisions, like choosing the greener alternative or picking a vendor who offers green options. You can make a difference right now, one choice at a time.

VACUUMS

Industrial

Industrial upright vacuums are as heavy-duty as their name implies. Choose for heavy-duty cleaning in offices, government buildings and hotels. Select a vacuum with a wide cleaning path to clean large, minimally furnished rooms in less time; other widths are available for other layouts. A great choice for day cleaning, quiet operation features are a real advantage. Look for large-capacity shake-out bags or dust cups and extra-long power cords to maximize cleaning efficiency, save time and reduce maintenance. (pages 258, 259)

Filtration

Choose HEPA uprights to improve indoor air quality. A HEPA vacuum filter or bag retains 99.97% of allergens as small as 0.3 microns – or about 240 times smaller than a human hair. Items with HEPA classification range from vacuum filters and disposable dust bags, to completely sealed systems that force all of the air leaving the vacuum through a HEPA exhaust filter. Hospitals, schools and certified green buildings are ideal environments for HEPA cleaners. (pages 255, 256, 259)

Lightweight

A lightweight vacuum is built for quick, frequent cleanups and maneuverability. In spaces with furniture and other obstacles, this type is ideal for hotels, doctors' offices and schools. Choose from options such as cordless sticks and compact deep cleaners that deliver the same powerful performance of a full-sized machine. Many lightweight cleaners offer superior filtration, onboard tools and carpet height adjustment controls. (pages 255, 256)

Backpack

Backpack vacuums offer mobility as well as quiet operation. Back and shoulder straps secure the cleaner to the maintenance worker, adding to comfort and ease of carrying. Choose closed bag systems and highly effective multi-stage filtration, in which multiple layers of material thoroughly remove soil particles. HEPA filtration renders a backpack vacuum appropriate for environments where indoor air quality is a concern. Many models are surprisingly lightweight. Use in spaces with large expanses of bare floors and areas containing an abundance of furniture such as office buildings, schools and hospitals. (page 263)

Canister

Canister vacuums are flexible and compact, making them ideal to reach into inaccessible areas that are often hard to clean. Easy, powerful detail cleaning is enhanced by attachments including upholstery tools, dusting brushes and wand extension. Models with shoulder straps transport more easily and HEPA-ready units help improve indoor air quality. Choose canister cleaners for spaces that demand detail cleaning and those with an abundance of hard surfaces and stairs, such as schools, hospitals, hotels and office buildings. (page 262)

Carpet Extractors

Carpet extractors come in many shapes and sizes, from spot cleaners to full-size models with powered brushes to deep-clean large carpeted areas. Features like revolving brushrolls, fingertip controls, metal cleaning wands and large-capacity solution tanks add value. Ideal for use in spaces with high-traffic areas like offices, hotels and government buildings. (pages 265–269)

Floor Machines

Get hard surfaces to shine in high-traffic areas in schools, government buildings and hospitals. These units are designed to maintain and restore hard floors with the use of different pads or brushes for scrubbing, stripping, buffing or polishing. For this heavy-duty work look for quality construction. UL Approved models offer durable steel gears and parts. Smooth operation features, multi-speed motors and a safety shutoff switch, add to ease of use. (pages 269–271)

A. Scotch-Brite™ Surface Preparation Pad

Deeply scrubs and effectively removes most floor finishes, leaving a clean surface ready for refinishing. Ideal for various surfaces including wood, vinyl tile, sheet vinyl, marble, terrazzo and concrete floors. Scotch-Brite™ Surface Preparation Pads are engineered to help reduce or eliminate the use of harsh stripping chemicals. Minimizes operator exposure to stripping chemicals and slippery working conditions they can create. Helps reduce cost and labor as a result. Scotch-Brite™ Surface Preparation Pads require only neutral cleaner or water to effectively remove floor finish, preparing the floor for finish application. Use of these products helps contribute to LEED(R) EB v2.0 - MR Credit 5.1-5.3 Occupant Recycling, LEED® EB v2.0 IUOM Credit 1.1 - 1.4 Innovations in Upgrades, Operations and Maintenance, LEED® EB Operations & Maintenance - MR Credit 5.1-5.3 Occupant Recycling, LEED(R) EB Operations & Maintenance - Innovation Credit 1.1 - 1.4: Innovation in Operations, LEED(R) EB v3.0 - MR Credit 7: Solid Waste Management - Ongoing Consumables, LEED(R) EB v3.0 - IO Credit 1: Innovation in Operations. 10 pads per case.

	Specialty	Lined & unlined Neoprene, Nitrile, Nylon	Rough, oily, abrasive, hot or cold environments. Suitable for heavy-duty tasks.	291–293

Glove Types

Disposable/Single Use – Gloves from these materials are economical, often disposable and appropriate for general use. Users can find these materials made into gloves that are approved for a variety of settings.

Knit – Knit gloves offer comfortable fit and good flexibility and can also be used as a liner for extra protection. Look for gloves featuring PVC dots for extra grip.

Driver's – Excellent strength and durability combined with comfort and protection. Look for designs with shirred or elasticized cuffs when you are concerned about keeping dirt and debris out of the glove. Provides abrasion resistance, dexterity, durability and comfort.

Canvas & Fabric – Provides durability, dexterity and comfort. Look for palms featuring PVC dots or natural or synthetic hide when greater grip is needed. These gloves can typically be laundered. When sturdy synthetic fabric is used, durability is increased along with resistance to abrasions, cuts and punctures.

Supported/Dipped – Degrees of protection vary, with coatings to protect against solvents and chemicals and provide protection from abrasions, punctures and cuts.

Specialty – Box handling and other heavy-duty applications that might require exceptional dexterity, grip, and imperviousness to liquids, impact cushioning and other protection. Specialty gloves feature palms, coatings and materials and thicknesses designed for the most demanding users.

WE'VE GOT IT COVERED: *Eye Protection*

Personal protective eyewear, such as goggles and safety glasses, must be used in a workplace where an eye hazard exists.

Each day approximately 2,000 U.S. workers sustain an eye injury on the job that requires medical treatment. A third of the injuries are treated in hospital ERs and more than 100 of these injuries result in a day or more of lost work. The majority of these injuries result from small particles or object striking or abrading the eye.

When choosing eye protection, you'll want to analyze and identify the hazards of your workplace. Then, the choice can be made between safety glasses, goggles or a combination of faceshield with glasses or goggles as secondary protection.

Safety Glasses

Safety glasses protect against general impact. However, the speed of the impact must be taken into consideration. The higher the velocity, the more likely the safety glasses could be dislodged. In this case, goggles or a faceshield may be a better choice.

Goggles

Goggles are available in two styles. Direct vented or indirect vented.

Indirect Vented goggles are for protection against vapors, chemicals, liquids and dust.

Direct Vented goggles provide air flow to the eye area but are only approved for protection against particulates. These are for jobs such as grinding or cutting where dust is an issue.

Faceshields

A full faceshield is the best option for workers exposed to high speed flying particles or chemical splashes. These must be used in conjunction with safety glasses or goggles to protect against secondary hazards.

UV Protection

Crucial for workers exposed to ultraviolet radiation such as outdoor workers and welders.

Lens Coatings/Colors

Eye protection is available in a variety of coatings and lens colors.

Hard-coated – for applications where lens scratching is an issue.

Anti-Fog/Anti-Mist – for jobs where workers are exposed to extremes of temperature or warm humid environments.

Clear Lenses – for indoor or outdoor applications in below normal light conditions.

Gray or Brown Lenses – for outdoor use where above average light is available.

Amber Lenses – for applications where light conditions are below normal or where enhanced contrast is needed.

Eye protection should be fit to the worker or adjustable to provide for appropriate coverage. The worker's personal vision needs to come into play, with safety glasses that allow the user to wear their own glasses underneath.

You'll want to see good eye protection at work in your environment. Make informed choices and be safe.

GET SOME AIR: Using Respirators

The National Institute of Occupational Safety and Health, NIOSH, collaborates with industry partners and other government units to develop respirator standards in accordance with government regulations. Look for the NIOSH code that describes the standard appropriate to your workplace. Respirators reduce worker exposures when engineering control systems, such as ventilation and scrubbing systems, cannot. Employers can require workers to wear respirators to perform some tasks. Approximately five percent of all U.S. workers, in about 20 percent of all work establishments, wear respirators at least some of the time.

Particulate Respirators

Particulate filters are available in disposable or reusable models with replaceable filters. They cover the nose and mouth and provide protection from airborne particles including dust, mist, liquids and some fumes but not gases or vapors. They are rated by NIOSH according to what and how much they filter out. The ratings have a letter and number.

N – not oil proof

R – oil resistant (up to 8 hours)

P – oil proof (beyond 8 hours)

The numbers refer to the percentage of one-micrometer particles removed during trials. For example, a 95 rating indicates that the filter removes 95% of particles from the air.

Chemical Cartridge/ Gas Mask Respirators

Chemical Cartridge/Gas Mask Respirators contain replaceable carbon filters that absorb gas and vapor from the air. Reusable masks seal tightly around the edges to block out unfiltered air. Choose from Half-Mask, covering only nose and mouth, or Full-Mask, covering your entire face.

Several types of cartridge are available. These include chemical (blocks out vapors but not particles) and dual cartridge (includes a replaceable pre-filter for particulates).

SQUEEGEES

Product Type	Benefit Feature
Floor Squeegees	<p>Clears floors of water and much more (page 354). Use to clear away large volumes of mud, snow, slush, and other debris. Squeegee frames are made with galvanized steel to withstand the heavier workload. Nylon inserts (page 354) adapt squeegees for use with Acme-threaded handles.</p> 
Sanitary Squeegees	<p>Available as standard or brush/squeegee combination (page 354). Ideal for hospitals, bathrooms, kitchens, dairies, swimming pools and other areas where cleanliness is key. Durable polypropylene construction resists acids.</p> 
Water Wands	<p>Wash and wipe away at the same time! Water Wands (page 353) combine with aluminum handles (page 353) to wash thoroughly and reach difficult spots. Use to clean grout, uneven surfaces, tiling, and more. After the washing is done, the squeegee's rubber blades whisk away standing water, leaving the surface finger dry. Adapters are available (page 357) to create Acme-compatible sockets on the wands, allowing for the use of tapered or threaded handles.</p> 
General-Duty Squeegees	<p>Perfect for washing and wiping glass. Allows for easy handling and gentler use on fragile surfaces. Use the sponge for scrubbing, flip the squeegee over, then use the rubber blade for wiping water away. For use on vehicle windows, mirrors and smooth surfaces that need cleaning and instant water removal (page 355).</p> 
Window Squeegees	<p>Wipe away water with a longer reach. The soft, thin rubber blade clears water from any smooth, flat surface and works perfectly on windows. Handle allows squeegee to be attached extension wands to reach higher areas (pages 355-357).</p>

Smarter Material Management

Introducing the collapsible X-Cart

Durable, easy to maneuver basket truck efficiently transports an industry-leading 220 lbs. of supplies, then conveniently collapses to minimize storage footprint. Various models available including options to divide and sort materials with ease.

Upgrade today to the industry's most durable collapsible basket truck system.

- Industry-leading capacity
- Collapses to 4.5" wide
- Compact, efficient storage

The background image is a monochromatic blue-toned photograph. It depicts a person's hands, wearing work gloves, placing a large, rectangular cardboard box onto a hand truck. The hand truck is a standard industrial-style cart with a long handle and two large wheels at the base. The box is positioned on the platform of the hand truck. The overall scene is set against a light blue background, and the entire image has a soft, slightly blurred quality.

TRUCKS

Product Type

Benefit Feature

Cube Trucks

Use these durable and versatile trucks for a variety of bulky, load-carrying tasks including waste collection, material transport and laundry. Available in four capacities. *(Find these on pages 362, 373.)*

Tilt Trucks

This truck maximizes maneuverability. The design matches the name: these trucks make it easy to dump contents. Ideal for handling bulky materials and loads that are medium to heavyweight. Wheels and the overall profile help protect surroundings. Consider your need for the lid option. *(Find these on pages 362, 363, 373.)*

Platform Trucks

Accommodate loads of varying shapes and sizes aboard a high-capacity platform truck. Depending on what you're moving, you'll want to look at support—more when you're loading multiple, hard-to-balance items, less when loads are more well-balanced. Some platform trucks offer work-height surfaces. *(Find these on pages 360, 361.)*

Hand Trucks

Carry a surprisingly heavy load with ease and agility with a two-wheeled hand truck. Buy a model that's dedicated to this role, or combine functionality with a convertible truck that switches from a two-wheeled configuration to a four-wheeled platform. *(Find these on page 360.)*

Convertible Trucks

Change configurations to use one truck in multiple applications. Some versions combine removable shelving with a more open platform truck option. Others provide support alternatives that adjust to the loads you're transporting. *(Find these on pages 360, 361.)*

Scraper Mats

Did you know that 80-90% of all dirt that enters a building is tracked in on people's feet? Using a Scraper Mat can save money on cleaning as well as on floor maintenance and repair. Resilient vinyl loops on the mat's surface scrape dirt and moisture off shoes, trapping them in the mat for later removal. Shake, rinse or vacuum out the mat, and the dirt is gone!

Tops in Trash

Jaguar Plastics™ Perform

You and your trash deserve the best treatment. Jaguar Plastics™ Commercial Can Liners are here to provide it. Each item in the Jaguar line is rigorously tested and relentlessly abused to make sure it's big enough, strong enough, good enough for the job you need it to do. There's a Jaguar Plastics™ size, color, and grade of bag for anything you might put in the trash. Before you ever put it in the can, before you ever fill it up, your Jaguar Plastics™ bag has earned the top name in trash.

Can Liner Color—Black, white and natural are the most common can liner colors. The “see through” quality of natural bags makes them ideal for environments where transparency is required for security purposes. If transparency is not required, black or white bags are preferred. Special color can liners (red, yellow, blue, brown, gray) can be used for at-a-glance content identification. For example, red bags are often used to indicate hazardous waste while blue bags may identify recyclable waste.

Can Liner Roll Types—A *bulk pack* consists of can liners that are separately folded, then stacked on top of one another or are folded together. A *cored roll* consists of can liners that are rolled together on top of a cardboard cylinder (similar to paper towel rolls). A *coreless roll* consists of can liners that are tightly rolled together without a cardboard cylinder. The can liners on both cored and coreless rolls may be connected by perforated edges or interleaved for nonperforated dispensing.

From your lightest work projects to the toughest, make sure safety and hand protection are at the top of your list. We carry work gloves to fit every task, including general-, specialized- and multi-purpose, gloves with greater strength and abrasion resistance, premium gloves that minimize hand fatigue and gloves with longer cuffs to maximize wrist protection.

Commercial Coreless Roll Can Liners

ISO registered facilities ensure superior quality and consistency. Made from high-quality resins for reliability and consistency. Star seal bottom design distributes weight evenly—creates a seal up to eight times stronger than the film itself. Innovative “clamshell” box with E-Z identification code number system to eliminate confusion. Perforated roll, except where noted.

BAGS & CAN LINERS

Choose from two types of plastics

Linear Low-Density (LLD)

Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears, either from the surrounding environment or through transportation to disposal units. (Find these on pages 390–393)

High-Density (HD)

When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits, performing well with waste that is heavy or has sharp edges, such as glass or other industrial items. (Find these on pages 393–395)

Strength grade and gauge

Throughout this section, you'll see items listed by strength grades as well as gauge. Here's how the two measures relate. Refer to this data to make the appropriate choice for your applications.

Light — Use for crumpled paper, cups and light waste.

Medium — Appropriate for packaging waste, wet paper and similar mixed trash.

Heavy — Choose for light wood, metal scraps and wet cardboard.

Extra-Heavy — Select for when trash is consistently heavy, wet or sharp.

Super/Extra-Heavy — Use on the heaviest cleanup jobs, in warehouses, cafeterias, or facility grounds.

Gauge Equivalents

Strength grades are based on static load, also known as lifting strength. LLD and HD plastic materials achieve the same static load with different gauges; order your bags accordingly. Use this chart for easy reference to determine approximate gauges.

Strength Grade	Linear Low-Density Mil Gauge	High-Density Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Capacity

Know the capacity of your receptacles and select the bag or liner to suit. Bags and liners are available in a multitude of sizes; gallon capacity is listed with each item throughout this section.

Bottom seals

Star Seals — The most common type. Conform easily to any shape waste container, distribute weight evenly inside the bag and have the maximum carrying capacity.

Flat Seals — Holds more volume than like-sized star seals. Appropriate for somewhat lighter weight loads.

Gusset Seals — Another seal found in flat-style bags. Offer a good fit in certain receptacles and appropriate for somewhat lighter loads.

A collection of disposable food service items arranged on a white background. In the foreground, there is a white plastic cup with yellow and blue stripes, a black plastic fork, knife, and spoon, a white styrofoam container, a small pink and white patterned paper bowl, a large aluminum foil tray, and a white paper plate. In the background, there are two large rolls of white paper towels and a box of Boardwalk Cling Film. The box is blue and white, with text that includes "12' X 2000'", "CLING FILM", "ITEM # BWK 7202", and "PREMIUM QUALITY CLING FILM".

Boardwalk® foodservice products have your needs covered... and wrapped... and served up in style. New this year, there's high-quality butcher paper and freezer paper for those specialized kitchen tasks. As always, there are the convenient, affordable, disposable products on which so many establishments have come to rely.

Scotch-Brite Griddle Cleaner

Scotch-Brite™ Quick Clean Griddle Liquid Packets come in pre-measured portions for powerful, cost-effective cleaning. One packet loosens and lifts carbonized grease and food soil on contact, for easy removal. There are no strong chemical odors or irritating fumes, either. Scotch-Brite™ Quick Clean contains no caustic soda as found in other griddle cleaners, and it's safe to use on your food contact surfaces.
