# Prevent the Spread of Germs This Cold and Flu Season with Products that Minimize Environmental Impact

The Center for Disease Control and Prevention (CDC) reports that flu activity usually peaks in January or February in the U.S. Consider environmentally-preferred products for your hand cleaning, surface cleaning and facial tissue needs. Products featured in this article may reduce the impact on the environment and human health, in addition to fighting the spread of cold and flu germs. Many of these products have biodegradable or recyclable content, reducing the waste going into landfills; and all products are non-toxic so exposure to harsh chemicals is limited.

## HAND SOAP

Did you know that hand washing has the potential to save more lives than any single vaccine or medical intervention? According to the CDC, hand washing is one of the most effective and inexpensive ways to prevent the spread of cold and flu.

### Dial® Basics HypoAllergenic Liquid Soap

HypoAllergenic Dial® Basics soap is a mild liquid lotion soap that is gentle on the skin. With its fresh floral fragrance and rich look and feel, Dial® Basics Soap is a premium product with an emphasis on value. It is certified by Green Seal™. The product is biodegradable and safer for aquatic life.

Product Number	Size	Case Qty.
<b>DIA 06044</b>	16 oz. Bottle	12
<b>DIA 06047</b>	Gallon Pour Bottle	4

## SURFACE CLEANER

The CDC recommends that hard surfaces be cleaned with common household cleaners to remove germs, dirt and impurities. Germs can live on surfaces for hours or even days. Prevent the spread of germs with SCRUBS® Green Cleaning Wipes.

### SCRUBS® Green Cleaning Wipes (DYM 91828)

Pre-moistened cleaning wipes are an effective way to clean water-safe surfaces while remaining environmentally responsible.

The wipes are non-toxic, contain a low VOC formula and do not contain dyes or hazardous ingredients. The biodegradable and compostable wipe is flushable, non-flammable and phosphate-free. The container is completely recyclable.

## FACIAL TISSUE

To prevent the spread of germs onto surfaces or into the air, the CDC recommends coughing or sneezing into a tissue or onto your sleeve.

### Marcal® Aspen Facial Tissue (MAC 3305)

Aspen Facial Tissues feature an easy reach opening for quick and easy dispensing. The product contains 100% recycled paper. The paper is whitened without chlorine bleach and no dye or fragrance has been added. NRDC endorsed.

## CHOOSING THE RIGHT CAN LINER IN 2 EASY STEPS

### Step 1. Choose plastic type and gauge.

#### Linear Low Density Bags (LLD)

Tougher transport conditions require the superior tear resistance of LLD liners. This plastic is designed to perform in environments with higher risk of tears, either from the surrounding environment or through transportation to disposal units.

Suggested applications:

Sticks • Rough yard trimmings • Metal w/sharp edges • Food w/rough edges • Objects w/rough corners • Plastic: eating utensils • Abusive transport conditions • Glass bottles

#### High-Density Bags (HD)

When greater puncture resistance and load capacity are the priority, select HD liners. Even with thinner construction, HD liner material delivers puncture and load benefits, performing well with waste that is heavy or has sharp edges, such as glass or other industrial items.

Suggested applications:

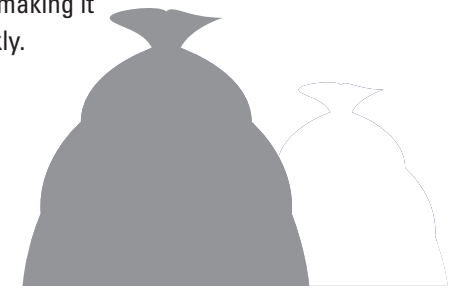

Office waste baskets • Dirt, grass, rags • Paper, paper plates/cups • Cans w/out sharp edges • Food w/out sharp edges • Smooth heavy objects

### Step 2. Match product with your can

LLD and HD plastic materials achieve the same static load with different gauges.

Strength Grade	Linear Low-Density Mil Gauge	High-Density Micron Gauge
Light	.35 – .44	5 – 9
Medium	.45 – .57	10 – 12
Heavy	.58 – .69	13 – 14
Extra-Heavy	.70 – .89	15 – 17
XX-Heavy	.90 – 1.14	—
Super	1.15 – 1.39	—
Super-Heavy	1.40 – up	18 – 24

Know the capacity of your receptacles and select the bag or liner to suit. Gallon capacity is listed with our liners, making it easy for you to find what you need quickly.

# CAN LINERS

## Commercial Coreless Roll Can Liners, Value Packs

ISO registered facilities ensure superior quality and consistency. Made from Formosa resins for reliability and consistency. Star-sealed bottom design distributes weight evenly — creates a seal up to eight times stronger than the film itself. Innovative “clamshell” box with E-Z identification code number system to eliminate confusion. Compact, coreless interleaved rolls are designed for effortless “one-at-a-time” bag dispensing.
